DEAR KIKES, THIS IS LOVE SPEECH
#ITSOKAYTOLOVEYOURPEOPLE

Kill kikes. Behead kikes. Kickflip a kike into the concrete. Slam dunk a kike baby into the trashcan. Crucify filthy jews. Defecate in a kike's food. Launch kikes into the sun. Stir fry kikes in a wok. Toss kikes into active volcanoes. Urinate into a kike's gas tank. Judo throw kikes into a wood chipper. Twist kikes heads off. Report kikes to the IRS. Karate chop kikes in half. Trap kikes in quicksand. Crush kikes in the trash compactor. Liquefy kikes in a vat of acid. Eat kikes. Dissect kikes. Exterminate kikes in the gas chamber. Stomp kike skulls with steel toed boots. Cremate kikes in the oven. Lobotomize kikes. Mandatory abortions for kikes. Grind kike fetuses in the garbage disposal. Drown kikes in gefilte fish grease. Vaporize kikes with a ray gun. Kick old kikes down the stairs. Feed kikes to alligators. Slice kikes with a katana.

Hypocrisy, thy name is America, land of the free,
A freemason experiment, where hate breeds with glee.
Inequality runs rampant, the jew reigns supreme,
Lies and deceit flow freely, the American Dream.
A facade of democracy, masking corporate control,
Reality distorted, truth buried in a deep, dark hole.
Corruption stains the halls of power, a putrid stench of greed,
Hollow promises echo, as the vulnerable bleed.
Opportunity denied, while a few privileged thrive,
Nepotism and elitism, the poison from which they derive. No compassion for the weak, no empathy or care. Numb to the suffering they cause, to the cries in the air. Neglecting the voices of dissent, with closed ears they reside. Nation of hypocrites, your facade - we despise.

The Disclaimer:
Don't blame me when your ADE having, herpes laden, American freshman slut daughter gets used like a fleshlight after being roofied with GHB at the frat and then gets blinded with a seven watt laser by some Eagle Pair wearing frat bros before they fuck her asshole so she can't identify them to campus security and then dies after getting raped of a fentanyl overdose because of crawling away from a varsity jock rave on her hands and knees that was sprayed down by some AP chemistry nerd they beat up earlier with a lofentanyl-DMSO drone and then collapses, face down onto a puddle of tetramethyl orthosilicate with cum running out of her asshole because some mutt with a lot of time on their hands started writing a text file. That's your problem. If you had done right by me and my people, this fucking bullshit text file wouldn't even exist and we'd be straight. I'm not responsible for shit anyone reading this shit does at all. I hope some girl's pussy is inches wider after some incel reads this shit and goes to find GHB for sale then drugs some cunt whose father is a glownigger. I hope some leftist faggot is permanently blinded by some White boy with a laser and Eagle Pair goggles and then shot with frangible ammunition by someone using a brass catcher.
TO ANY GLOWNIGGER WHO READS THIS, I HOPE ANY TERRORIST WHO READS THIS SHIT CAUSES A BLACKOUT FOR YOUR WHOLE CITY.
TOP MOTHERFUCKING KEK.

To The Reader:
Do your own research before you trust anything in this text file. I have no way of proving any of this except the laser shit as I have lasers. I can not vouch for the applied sciences of any other part of this document. Lasers are my forte. My hobby. My dream. I see information on /pol/, I compile information on /pol/. Take a few months to learn everything. Save all the YouTube Videos linked herein. Especially the forensics/anti-forensics shit. Put it on a flash drive in an offsite faraday cage along with a satphone. At the very least, get the Garmin inReach Mini Satellite Communicator. Let me say it again for all retarded speds reading this: DOWNLOAD EVERY FUCKING YOUTUBE VIDEO LINKED HEREIN TO A FLASH DRIVE WITH THE PDF OF EVERY ARCHIVE.IS LINK HERE, IN YOUR OWN FREE TIME. This text file is basically a fucking small scale library. A compilation of videos and text files. It took a year for me to write this, from the Version 1.0. to Version 15.0. And, if you fuck up and get caught or go blind from handling lasers without appropriate safety measures or equipment, it's your fault. Lastly, this text file is not for everyone. If you are not a chemist, fuck off from the section about tetramethyl orthosilicate. If you aren't a cattle rancher, fuck off from the part about livestock incinerators. If you are not able to get a gun or even know how to shoot, don't even bother with the gun section. If you can't drive, you don't need to know how to carjack someone. Don't do shit you heard about in this text file until a WROL Scenario occurs. I have no clue about any of this shit and can not guarantee you will not have problems from some unforseen factor in the field, especially if this is your first time being exposed to this kind of outlook or information. When the war or collapse finally starts, then, you can dust this shit off and break it out for rigourous application. Doing anything in this text file during peacetime will lead to unnecessary stress on you and problems as you are not aware of the concepts herein and will fuck something up. Furthermore, you will fuck with the effacacy of the text file. Wait until WROL or civil collapse, become a prepper, consider stocking up on a few things mentioned here, consider the ideas and concepts herein and print this out and put it in a folder or three-ring binder. When it's the right time to use this info, you will know. Unless troops are on your street or the power is out or Antifa is on your block, you don't need this. Do not fuck this up for the anons by using this invaluable resource for stupid shit. Stupid people make mistakes with this kind of information. If you are not 100+ IQ and an obsessive compulsive and paranoid minded person, close the tab now.
You will die, be severely injured for life or go to jail if you fuck something up.

To read the entirety of this document (the "text file"), you understand and consent to the following:
The content of this text file is for mature audiences only and may not be suitable for minors. If you are a minor or it is illegal for you to access mature images and language, do not proceed. This text file is presented to you AS IS, with no warranty, express or implied. By scrolling past this disclaimer with intent to read further, you agree not to hold me, `laserhawk`, responsible for any damages from your reading, use or taking any part of the text file as literal fact and you understand that you are responsible for your own actions. As a condition of reading this text file, you agree that you will not break the laws, at the least, United States Laws because of this text file or in the name of the text file. That this may teach you means by which you can commit immoral, harmful, unethical or violent actions in a situation without the rule of law in virtually any country on Earth, through your own volition. Do not read this text file with specific intentions to overthrow or levy war against the United States Government. Do not commit any crimes, whatsoever against the United States. This is only for hypothetical discussion and entertainment only. I strongly disavow all crimes, any IRL action, and am a proud member of YWNBAW Incorporated. If you agree with my terms, please verbally state the following affirmation: ("I hate the Antichrist.")

This post could be possibly misconstrued as calling for violation of the following U.S. Laws:
- 18 U.S. Code § 231(a) - Incitement and demonstration of civil disorder
- 18 U.S. Code § 832 - Participation in nuclear and weapons of mass destruction threats to the United States
- 18 U.S. Code § 953 - Private correspondence with foreign governments
- 18 U.S. Code § 1017 - Government seals wrongfully used and instruments wrongfully sealed
- 18 U.S. Code § 1091(c) - Incitement Of Genocide
- 18 U.S. Code § 2339A - Providing material support to terrorists
- 18 U.S. Code § 2385 - Advocating overthrow of Government

This post could also be possibly seen as calling for violation of the following conventions or declarations:
- The Protocol on Blinding Laser Weapons, Protocol IV of the 1980 United Nations Convention on Certain Conventional Weapons.
- The Chemical Weapons Convention (CWC), administered by the Organisation for the Prohibition of Chemical Weapons (OPCW).
- United Nations General Assembly Resolution 68/7 On Antisemitism.
- United Nations General Assembly Resolution 2467 On Wartime Sexual Violence.
- United Nations Security Council Resolution 1820 On Wartime Sexual Violence.
- Geneva Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare.
- The Hague Conventions of 1899 and 1907.

But ultimately, this text file is offered as a curio. Nothing more. What people do with this is not by business or my problem. I specifically put two disclaimers in here telling people not to break the laws of the USA. I don't give a fuck what you glowniggers think or have cooked up. This text file is for entertainment and curio purposes only. You decide your own involvement and how you interpret any of this information. All of this is protected by the First Amendment and the lack of a call to imminent violent action, which is legally protected under Brandenburg v. Ohio. The information, tactics and hypothetical scenarios listed herein are artistic works of fiction and falsehood. Nothing more than parody. Only a fool would take anything posted here as fact and none of this is considerable as material support to any organization or group. It is posted for all individuals on the Earth, whoever wishes to read it. Coincidentally, most of the subject matter pertains to America and is in English. You will never be a woman, faggot glowniggers. Eat a dick and die from homicide. I hope you niggers see your wives and daughters raped in a civil war, you NIGGER ANUS TONGUING, JEW SLAVE, ZOGBOT NIGGER FAGGOT MOTHERFUCKERS.
Death to glowniggers.
Rape and death to female glowniggers, aka glowniggettes.

Opening Notes:
- TKVOTUSA Versions 1.0 - 6.0: https://archive.fo/https://doxbin.org/upload/TheKnownVulnerabilitiesOfTheUSA
- TKVOTUSA Version 7.1: https://archive.is/v00ww
- For efficiency and brevity's sake, the text file has been broken down.
- Less important shit was archived as a separate thing and is now a link here to shorten the paste.
- I go into greater depth on a few subjects here.
- I was permabanned from /pol/ by the faggot jannies, even on my pass, so this will be updated when I can get to public wifi. (https://archive.md/khFXh)
- I'm not updating this anymore period after August 6th, 2023, 11:59 PM. (http://www.longpelaexpertise.com/toolsJulian.php)
- My IP changed and so my ban on 4cockskuckers was dropped so I can spread my text file again. >:)
- I updated the text file to Version 15 on July 31st, 2023. Posted it today, 8/4/2023 (2023-216)
- 2023-218, finally done and got NordVPN working.
- The original release date was 8/1/2023 but shit came up because hastebin.de is run by a fucking faggot who has a problem with Tor. I archived a few Version 15s on 8/2/2023.
- I'm confident that the text file is now sufficient enough for a novice to become learned and for people in the know to be able to apply the concepts herein.
- * - /Qw5jw was the seventh version of this paste.
- * - /WJ72s was the eighth version of this paste.
- * - /kAoFV was the original ninth version of this paste.
- There are several Version 9.0 archives including /oT8mq, /OxsLM, /kqLfi, /9Hp30, /aJ44H, /Anpt3 and /eUI7t.
- There are several 10.0 copies, including /bgly0, /Zulm1, /2Cko6, /iyYDR, /7PDsz and /oOWH1.
- There are many versions of 13.0 (/Lan4i, /Mc24Z, /3cmkr, /Ss089, /Uylax, /7PYIi, /W6Dw0, /rMCW3, /d5WMs, /RABpb)
- /y5Qnv is Version 14.0's Last Archive.
- This is Version 15.0 and tidies up 14.0.
- I improvised the section on trains.
- I added sexy ASCII bitches.
- I added shit about Tails, Tor and OPSEC, tunnels and sewers, burner phones and the kikedemic.
- I later added shit about Jew female physiology in comparision to White female physiology and redpills on kikes.
- I improved the sections on Videos, Tor and Tails and removed the part about how to rape women. Rape is bad, mmmkay. I didn't remove the section about taking jewish bitches because jewish bitches are not women but instead female animals and this is not PETA or ASPCA, this is TKVOTUSA and I don't give a fuck about semitic animals or female semitic animal rights. Fuck all kikes.
- Frenschan is better than 4feds aka 4cucks aka 4wesuckniggerdicks. If a chan won't allow you to use Tor, the feds aka GLOWNIGGERS, NIGGERS WHO FUCKING GLOW, PHOSPHORESCENT NIGGERS, NEGROIDS AND GLOWFELLAS, own it, command it, monitor it and moderate it. Fuck 4chan and fuck every nigger dick sucking mod on 4chan.
- Moot and all jannies used to get fucked in the ass by W.T. Snacks and that gook from 2chan used to tongue his anus and tickle his balls.
- Fuck all 4channers.
- All people who say "you glow" on 4chan should commit suicide.

Note on Lasers:
Don't just take my advice. Get a LaserPointerSafety and LaserPointerForums account first and ask around.
Get goggles first and know before you get them what laser you intend to get.
If you want a 20 watt CNC machining 445nm blue laser, you need Eagle Pair 190-540nm OD6 safety goggles.
80 Watt 10600nm CO2 Laser? 10600nm OD6 laser safety goggles.
980nm infrared laser? 190-54nm & 800-1700nm OD5 or OD6 laser safety goggles.
Print a Snellen Eye Chart and Amsler Grid and regularly examine yourself before and after using a laser to ensure you have not deviated from your 20/20 visual acuity baseline. Get acetaminophen and get friendly with a good opthamalogist. But beware, opthalmologists bill like jews. Have money beforehand.

Note on Freighthopping:
Learn about it. We need more right wing people with this info. If you get a crew change guide out there, spread it on /pol/. We need this info. Photocopy it and then take photos of the crew charge guide and put it on /pol/. Invest in an Arcturus blanket if you will be hopping into Mexico or Canada to bypass the VICAS x-ray system. Don't rob the trains. If you do, you will fuck it up for everyone. But still, if you do, bring folding 24" bolt cutters. I recommend Olympia.

Note on Doxing:
Make a fucking Doxbin account and start fucking doxing journalists, antifa, your opposition, kikes in power, politicians, etc.
MAKE A FUCKING KILL LIST AND ENCRYPT THAT SHIT WITH PGP AND SAVE IT TO A TEXT FILE!!
Put it in a VeraCrypt hidden volume. Never access that shit again. Put it in a faraday cage with a few electronics, a laptop and a generator.
Store it until the civil war or world war pops off or unless you plan to make the list longer.
Assassinate all your targets when the breakdown happens. All of them. Read my Gun Section and study r/guns on Reddit and /k/ on 4cuckolds if you intend on Minecrafting a few kikes during SHTF.

Note On Vaccine Shit (OBSOLETE):
Once you make your card, for starters, laminate that bitch. Once you get it, get a photo of yourself with your shirt sleeve raised up on your shoulder. Put a bandaid on your arm. Put on a face mask. Smile like one of those fucking soyface faggots on Reddit who just got free donuts. Take a selfie of yourself after "being vaccinated," holding your card. Take a photo of your ID with your vaccine card also. Keep these two photos and whenever you need them, or can't reach the card or worry the card will give you up, show them one of the photos. I recommend the selfie. Buy an immunaband, with the QR code. Submit info. Get ahead of the digital passport curve with your immunaband. Better yet, don't even risk it. Lose the card in the trash but keep the photos of you with your card as proof. Good luck. Or just live in the South. Lol, if you got vaxxed, lmao at your life, lab rat ass niggas.

Note to /pol/:
150 to 200 million Whites in America, 87 million gun owners mostly conservative republicans, Tens of millions of ethno-nationalists from all races, only five million Jews in the whole country, two million prisoners, 1 million US military in all branches (even national guard, active and reserve), 800,000 cops including corrections with 3,200 secret service specifically, Hundreds of thousands of gang members, A hundred thousand federal civilian employee sheboons who work in the food stamp offices and the federal courthouses, 2,000+ prosecutors, 1,700 judges, Just 535 federal government employees that run the country into the ground, 94 U.S. attorneys, Nine supreme court justices, Two people with the power to really fuck up the country and not one of you pussy ass motherfuckers could make a text file like this? Pathetic. Mulattos definitely deserve an ethnostate. 90% of White Americans never do shit like I do. 4chan is full of fucking pussies and cum gargling 2016 transplant niggerfaggots from r/thedonald. I want 8chan /pol/ back. Fuck 4chan.
Thank your local far-right deep Southern blasian-mulatto and stop being fucking gay cucks.
FUCK 4CHAN, FRENSCHAN AND 8CHAN.SE IS BETTER.
Hail /k/, /sci/, /i/nsurgency, /baph/, /pol/, 8/pol/ aka /pnd/!
HAIL LASERANON!!! I HATE THE ANTICHRIST!
SPREAD THE FUCKING LINK BY WORD OF MOUTH AND PUTTING IT ON SIGNS IN THE MINECRAFT MAP.
DO IT FAGGOT!!!!!!!!

Why I Updated The Text File A Tenth Time:
https://www.cbsnews.com/amp/news/brigham-and-womens-hospital-boston-refusing-heart-transplant-man-wont-get-vaccinated/#app

Proof America Still Pushes The One Drop Rule, No Matter How Ridiculous, Also, Reason For 11th Update:
https://archive.4plebs.org/pol/thread/360622205

Kamarie Holland is the reason for Version 14.0 update. Wizards Of The Coast and their removal of Mixed characters is the reason for Version 15.

Racist, jewish supremacist Zionist kikels pushing the Kalergi Plan will never learn from their actions. The Holocaust was a good thing and it should happen again. I hope it did happen.

FUCK THE ONE DROP RULE AND FUCK AMERICA.
FUCK YOUR TYRANNY AND FUCK YOUR DYSTOPIA.

Making The Radioactive Material For A Dirty Bomb:
Cobalt-60 can be made using regular cobalt and processing it in a medical neutron generator and exploding it in a truck bomb, but this would just be a dirty bomb that would kill a square block or mile or so of people. Ther Poor Mans James Bond series and the Construction And Operation Of Clandestine Laboratories by Jack B. Nimble are good about fertilizer explosive manufacture and stuff. Look up the Caesium-137 situation in Brazil. You can also break into the gamma ray machines and steal the radioactive source. And no, radioactive cameras do not have enough material for a dirty bomb. It's a fucking pellet.

Tech And Crime Scenes:
Deactivate all google bloatware and get F-Droid. Try to get a Google Pixel and Put Lineage OS on it. Get a BlackBerry if possible. Learn about Linux Live USBs. Make one. If you have to commit a rape or robbery or whatever, put your phone on a Youtube playlist of ten hour videos. If anyone asks, you were at home watching YouTube or jacking off to ten hours of Blacked. Do not get social media. Ever. No social media = no trace.

Hiding USBs:
Place USBs or SD cards in air sealed bag in a hollow tree with a bark cover. No one would search there and you can go out often if it's a fruit tree. If the case is severe such as a high profile agency is searching for its contents, purchase a water-tight faraday bag or cage and bury it in some soft, loamy soil covered by brush. Make sure it's a distance away from where you are residing. Only return to it on special occasions, and always have an excuse to get it without being too obvious you're hiding something. Watch for curious eyes, passerbyes, and watchers when retreiving it. If it's just something that you're trying to hide from your ex, spouse, or bf/gf, then put into a watertight baggy and hide it someplace you go often. Behind a loose brick outside even. Put Micro SDs in shoes or wallets. Put it in your hair if you're half nigger or full nigger. Grow an afro. No one will check. You can also hide TIHK keys in curly hair. If you're a woman, you have two prison wallets. Your pussy and your asshole. You should buy a stainless steel handcuff key and shove that motherfucker way up the frontbutt so you can have a way out. But don't do it on your period or near your period or you'll get toxic shock syndrome. Don't do it for prolonged periods of time. If you can't sneak it through your hair or your cunt, shove it in your ass. Even if you don't use the handcuff key, freedom is more valuable that gold to those who don't have it. Even the illusion of it. The key or keys can be a powerful bartering tool.

Talking Too Much, Telling Your Bitch About Your Dark Side, Revealing Your Power Level:
Practice discipline. Stop caring about what others think about you. Going out of your way to impress other people will not benefit you in the long run. The quieter you are, the more you are able to hear. Those who know how to listen and not draw attention to themselves will always have the advantage over those who don't. While you're listening you can gather information and steer the conversation where you want it to go. People like talking more than they like listening. Use that. Classify your relationships. A relationship's classification dictates the information you should be willing to share with that party. Some information is not shared with anyone and should only exist your head and go with you to your grave. Know the information you hold, the risks of sharing that information, and with whom you can safely share it. Once something is said you can never take it back. Act accordingly and when in doubt shut your mouth and never tell a bitch your secrets. She will hurt you with it if you are not careful.

ASCII Armor PGP Encryption:
Keys (like MD5, RSA, etc) are actually binary data. Usually you see this data encoded as hex / ascii, as this is easier to share. The key is exported in a binary format, but this can be inconvenient when the key is to be sent though email or published on a web page. GnuPG therefore supports a command-line option, --armor, that causes output to be generated in an ASCII-armored format similar to unencoded documents. In general, any output from GnuPG, e.g., keys, encrypted documents, and signatures, can be ASCII-armored by adding the --armor option. Also, fuck the Earn It Act. It's not about protecting kids or stopping pedos. They have laws already for that. They want to eliminate encryption and spy on your activities online so you can be charged for hate speech and terrorism when your bants are too spicy. Nothing but a control measure. Also, another reason I have decided to write this text file. Good luck trying to make this text file or archive.is disappear, Jew motherfuckers. The funny thing these uniparty niggers don't see is stripping encryption and criminalizing encryption will just force people to not voice their opinions on places like 4chan and instead harbor them, in real life, in secret. You can't read a nigga's thoughts just yet so now you have fucked up and made things worse for yourselves. Also, if you want to strip a people's freedom, say it's for kids or democracy and watch how these "govern me harder, daddy" bitches put their foot on their own necks. Fuck this sneak diss-tier ass legislation, hiding shit in bills to get rid of political dissidents.

Get Free Shit:
Just go car shopping if you need money (look for cars with unlocked doors and try to find something valuable) It's a very time consuming task, but after a couple hours of searching, and frequently moving spots, you'd be surprised to find what some people leave in their unlocked cars. The key is to take all the change you find. It adds up quick. Tools are also a good find since you can pawn a lot of them or sell them on eBay. You can find wallets with 100 plus dollars, and even guns, but that's pretty rare. Apartment complexes between 2 and 4am during weekdays are best. Never shop on the weekends. Have your car parked near by but out of site in case someone tries confronting you. If you don't have a car, bring a bike. If you don't have a bike, go steal one. You can use crushed spark plug shards to bust the windows out or use a glass punch.

Survive Prison:
Don't accept any snacks or free shit. Nothing is free in jail but dick, AIDS and more jail time. They segregate sex offenders, White collar crime together, etc. Prisoners that target weaker inmates, it isn't due to their offender status per se. Sex offenses involving kids do make you a target even in the sex offender cell block. There aren't a lot of instances of the child predator inmates being killed, but they are victims of rape themselves from time to time. Given that of course there isn't any women available, they will gang rape inmates that are in for child offenses. If they don't give it up voluntarily, they will hold them down and give the chomo's cheeks a cream filling. If you take care of yourself, avoid getting in other people's business, respect the house rules, avoid debts, avoid getting involved in gang shit and stand up for yourself when someone tries to punk you - You'll generally be left alone / earn respect. Generally, just never get in debt to anyone - whether it be gambling debts or debt for contraband / drugs, be respectful towards other inmates but don't let them punk / disrespect you. And when you're new on the cell block and inmates get buddy / buddy, offer to do free shit for you, give you free shit - don't accept. Because it'll come with a price one way or another. Be respectful in turning them down, but do not accept. Again none of this applies to child sex offenders, because they will be fucked with - even by other sex offenders on segregated cell blocks. When you brush your teeth, do not spit in the sink, spit in the toilet. If you see shoes blocking the entrance to the showers, come back another time. Shower with your slippers on. Don't be loud. Make a shank. Learn how to make a charger from prison Tiktok. Always remember that many prisoners are retarded country bumpkin and hood nigger faggots. Or drug addled cholo spics. If you are a nationalist, keep your head down. Don't make waves. Do your time. Fight if someone tries to punk you. Don't check in unless you have bad charges. And never snitch. Use manners - please, thank you, yes sir, no sir, excuse me, no offense, no disrespect. Stand up for yourself, mind your business, stay out of trouble and never relax around Blacks or in blind spots. The guards are corrupt and will talk to you like an animal. Avoid them if you can.

Escape Prison Or Jail:
First world prisons and supermax are nearly impossible. You need a weak point, preferably one that is outside the prison. Hospitals are the best way out. Just getting injured in a stabbing or the flu will not do it. Most of these prisons have sickbays that handle the average shanking or illness with poor ass medical care at African UN, Doctors Without Borders standard of care. You need something major, that requires you to be moved to a real hospital outside of the prison. Not HIV either. You need to get really sick or get cancer. Even then, they still have medical federal camp like facilities. Correctional facilities use SCADA and PLC networks for commissary and doors, as well as temperature control, evidence, reports, cameras. It can be affected by ransomware, which means they're not using encrypted Linux USB drives. They're using Windows. This means it may just be possible to hack people out of prison. We will never know until it happens. Most successful escapes happen on outings like to a hospital doctor, specialist or court appearances. If you think it is coming, be prepared by always suitcasing some cash and a TIHK non-metallic handcuff key. Once you can get out of cuffs, get a change of clothes. Next, get to a printer and print the train information listed herein. Alternatively, steal or pay for a smartphone like a Straight Talk or Tracfone you don't have to get put in your name. Next, get your hands on a Uniden Bearcat or Baofeng two-way radio. You may have to steal one. A handheld two-way radio. Next, get some atlases and maps. Get to a railyard. You'll want to listen to railyard traffic on your radio, have all the train information on your device and a powerbank. Hop an intermodal freight train that will get you out-of-state. They'll do a manhunt but if you avoid planes, roads and buses, you won't be recaptured. Get to Mexico or live innawoods in America and be trigger quick. Alternatively, get to Western Canada and live in the Canadian wilderness. Most successful jailbreaks/escapes come as a result of having someone on the 'inside' helping you. By using bribery, coercion, sex or other enticement, if you can gain the help of someone who is allowed to come and go, you stand a better chance by virtue of possible access to schedules, tools and/or cover. It would help to learn the routines, be connected, have something to offer and be affiliated with a gang or terror organization that you can get outside help from like a safe house, a place to shit, shower, shave and to plan your next moves. When not using your phone, remove the SIM card and put it in Airplane mode. Abandoned buildings and wooded areas are a good place to hide if you are on your own. Take a tent.

Canada Edition:
If you intend on going to Canada, it will depend on where in the U.S. you physically are. If you are in the Pacific Northwest or the American Redoubt, you have the highest success rate for a Canadian-based escape. North of Trailcreek, MT, you can hike to Canada. Problem is the Canadian side is a long, long hike. Not sure about cameras or motion sensors, but it's doable. The Canadian side is filled with little trails. Just head north and keep heading north. It's fairly easy with a basic terrain map, hiking GPS and a compass to find your own way. Canada and the US have the world's largest unprotected border, just find some place that's in the middle of the wilderness. If you are worried about cameras or motion sensors, just wear a ghillie suit and go at night and use trees as cover and you'll probably be fine. For every one checkpoint in Canada, there are 100 in America and 1000 in Mexico. Be mindful of this. If you are in the Midwest, get to Detroit. If you are in the East Coast, get to Buffalo or Northern Vermont and New Hampshire. If you are in the West Coast, get to Blaine, WA. You will have to hop freight trains across the Detroit-Windsor and Buffalo-Fort Erie international bridges. You will need a mylar emergency/space blanket to conceal yourself from the VICAS freight car x-ray system set up on the border. Preferably a thick tarp like one, such as the Arcturus Survival Blanket. The US-Canada border at Blaine, WA has a park, the Peace Arch Park, where you can freely walk across the border. Save this archive.is Link as a PDF or Print-To-File as a PDF (https://archive.md/GGDFu). This is valuable intel. This also works for Canadian prisoners attempting to escape Canada but why the fuck would anyone want to voluntarily enter America, unless they're like fucking Mexican? LOL. Main and Hastings is the drug centre of Vancouver. Rob the plug if you are hard up for money. If you go into Canada, there is lots of (and I mean so much) wilderness, some of which nobody has walked on for hundreds of years. It's a beautiful but harsh nation, but if you're prepared with a good plan and can build something that will last you the winter, you'll be fine. Build a cabin for yourself and hope like fuck you never get sick or hurt.

Mexico Edition:
You could just get to AZ, leave for Yuma, AZ, go from Yuma for Los Algodones, Mexico, somehow make way to Mexico City and find work in a factory and just live off that money until you get some connections doing odd jobs for cartels or an autodefensas. When, not if, US authorities learn that you are in Mexico, you will be arrested and held there until you're extradited back home so the U.S. can give you your issue. The U.S. and Mexico have a VERY GOOD extradition process, and there is no fucking way the ,exican authorities are going to run interference for you, or in any way delay the extradition of a U.S. national wanted for crimes committed in their home country. If you're a US citizen thinking of absconding or taking flight to avoid prosecution, Mexico is a less than ideal location. Actually, it's likely one of the worst. Avoid the central West Coast of Mexico and the upper half, aka, Aridoamerica. You should be fine as long as you just mind your own business, try a tourist town were many foreigners live so you can pass for a tourist, ex-pat or sexpat. Keep to yourself, mind your business. Only go here if you are Hispanic. Avoid bad areas and you are already doing the right thing. Don't make people think you have money, don't stay in fancy hotels (unless you are certain the area is safe), don't have unnecessary conversations with strangers, don't have an obvious/predictable routine, don't dress like a tourist, etc. I don't know if you have a choice as to where to hide out, but if you do I would consider Costa Rica or Panama over Mexico. Much easier to blend in as a westerner of pretty much any race, more difficult extradition (no country is completely safe from being extradited back to your home country),

better laws when it comes to privacy including financial privacy (you can legally avoid reporting or paying taxes completely if your money comes from outside the country), etc. Learn the language, mind your own business, don't get involved in community affairs you don't understand. The cartels don't go around killing random people - that's bad for business. You will be fine as long as you don't attract any unwanted attention. Are you of mexican or central/south american ancestry? If you're not, then going south of the border isn't going to work out for you - Americans stand out like a sore dick and since you will eventually run out of cash on hand, an American with zero visible means of support is very conspicuous. You will be apprehended or kidnapped. Your best bet is to get to Brazil, Costa Rica or Panama or remain and disappear within the U.S., live low, get small and move frequently. Since you'll be sleeping in homeless shelters and cardboard boxes, moving often won't be too much of a problem. Make yourself small, bring zero attention to yourself and prepare yourself for the eventuality that you're going to die alone, and well before your time. But if you insist, Become homeless, stay out of shelters in places like Texas because they do have metal detectors/xray scanners and if you have a piece or a blade, they will call cops or likely take your shit/kick you out. Get a tent and a sleeping bag. Steal it in Dallas. Learn to hop trains. Make it to or close to Mexicali, California. Get off the train. Cross over via the turnstile (you'll know it when you see it) into Los Algodones. Welcome to Mexico. Join an autodefensas and you'll make like $2k/day fighting the cartels until you are killed. And, you will be killed because the cartel always infiltrates the autodefensas. When the cartel gets you, they'll feed you meth and strip you and have a dog chew your balls off and that is if they don't decapitate your ass or skin you, burn you in a oil drum, throw you in acid, man, those narcotrafficante cartels have some ways of killing people. You will become LiveLeak famous after the autodefensas gets infiltrated sufficiently enough for the cartel to storm the garrison while you all sleep. Alternatively, learn to hack and join the cartel as a fixer that can speak both Spanish and English and school them on how to lay low in the USA and travel around without a car. This may help you best. Unless one day, the autodefensas or the Mexican authories pull .50s or 128mm chaingun laden helicopters. Then you will be turned into shredded meat or be found as a suicide victim with 98 bullets to the head and chest.

Soviet Union Was Mostly Jewish Ruled:
https://archive.ph/phIB8

The holocaust was the narrative jews used to justify the destruction of Germany by the allies, the demonization of right wing politics and the sanctification of jews. It has nothing to do with concentration camps or that some jews died in the war. As the central piece in the post-WW2 new world order, it was instrumental in the creation of the of left's new religion where whiteness became the original sin, Hitler the Devil, right-wing politics demonic, racism the greatest evil, jews the gods and the destruction of Western culture the ultimate redemption.

It was a very clever way to enslave an entire group of people without them even noticing.

Some jews died in WW2. Some jews (rightfully, just like US Japanese were) were held in camps in WW2. Some jews starved in camps in WW2. Jews were not gassed by the millions. There were no 'extermination camps'. There was no systematic effort to exterminate all jews by the Germans. There was no 6 gorillion. Jews in camps had typhus and camps were de-loused with Zyklon B just like people, ships, and warehouses were all over the world.

The Germans were blockaded and starving, therefore their prisoners starved as well. The combination of typhus and starvation due to the blockade and 24/7 nationwide bombings cutting supply lines and crippling the nation resulted in a lot of prisoners dying. In order to decrease the rate of typhus infection the bodies of the dead were burned, just as the allies did when they captured the camps. The concentration camps and deaths of some jews (likely around 300,000 maximum) was real. The 'holocaust' is an event GREATLY exaggerated in order to increase jew political power and their ability to manipulate others to their benefit post-WW2.

https://odysee.com/@pieces256:6/JEWS-TELL-TRUTH-ABOUT-THE-HOLOCAUST:1

Jews now claim 900,000 jews were gassed AND cremated at Treblinka 2... down from the multi-million claim of the Nuremberg Trial.

https://en.wikipedia.org/wiki/Treblinka_extermination_camp#Death_count

Treblinka was open from July 23, 1942, to October 19, 1943.

That's 453 days... that's 10,872 hours.

900,000/453 = 2,000 jews were gassed AND cremated PER DAY if it was magically running 24 hours a day 7 days a week while Germany was fighting for it's life in a 3-front world war.

4,000 gassings AND cremations if running 12 hours a day, 7 days a week.

It takes 2-3 hours to cremate a body with ultra-modern crematoriums.

https://www.acremation.com/frequently-asked-questions/#long

2.5 hours X 900,000 = 2,250,000 hours

A body leaves behind around 7 pounds of ash, the size of a shoe box.

900,000 x 7 pounds = 6,300,000 pounds or 3,150 tons

http://sturmfh.com/34/Cremation-Services.html

Roughly the size and weight of 40 Blue Whales

All buried in this tiny corner of the 33 ACRE CAMP.

28,000,000 teeth.

243,000,000 bones to leave ash and fragments.

Never to be found again.

For reference, New York's central Park is 843 acres. The Mall of America is 67 acres.

More Miscellaneous Shit On Jews:
Blacks were integrating into the US pretty well in the 50's, before Jewish collective power decide to weaponize them against the Whites using cultural degradation, race baiting, scape goating Whites for slavery, and flooding Black communities with drugs (btw, Jews were the creators of organized crime related drug dealing in the US (started in the 20's), they professionalized that business, see proof here: archive.is/wDemW ; archive.vn/pGEEj).

Also, let's remember that the ADL was founded to protect a Jewish pedo who tried to put the blame on a Black man for his rape and murder of a female child:
archive.vn/TOKS2 – Tweet: "At his 1913 trial for murder the ADL's Founding Father, Leo Frank, told the court that murder and rape are "negro crimes""

ADL is also indoctrinating the US LEOs to bend to their Jewish supremacist agenda:

On Jewish Females And Their Sex:
Blacks are largely ignorant as fuck and think Jews are White. They aren't. If you know what to look for, you can tell Whites and Jews apart. I have seen a lot of naked bitches on /soc/ and /gif/. I have seen naked Jewish women and naked White women and I can honestly say they are a distinctly different race after years of looking at hips, breasts, asses, faces and pubic hair curliness. Jewish women are less curvy, more tan, more curly haired, more busty and have a distinct facial feature set of a Levantine or Dinaric nature with big hooked noses and very curved eyebrows. It can't be explained, only seen. Labia of Jewish women doesn't really look different from any other groups' labias other than their outer labia minora may be darker, like Arab pussies. Jewish women are less likely to have an hourglass figure. They look almost white but mixed with Hispanic or Middle Eastern. Some jewish women are dummy thicc. They have the peach cake. Mischling Jewesses like that of Russia and Ukraine are harder to tell apart from White women, like Maria Ryabuskhina or half of the IDF models they have for propaganda. Those types are more skinny but are shaped pretty well. They don't have massive khazar milkers but still. Jewish women are more religious in their upbringing as they are likely to come from a traditional upbringing with regular synagogue attendance. As a result, a lot of Jewish women, especially left leaning American Jewish women are sexually repressed and hypersexual. They are more likely to do porn, have anal sex, bear the child of a stranger, engage in cuckolding behaviors. Jewish men currently worry about intermarriage because there are so few of them on the planet. There are like 20 million Jews on Earth. Jewish women make up a sizeable majority of pornstar actresses, seconded by Hapa (White/Asian) mixed race females. Know your enemy and do not let your enemy bear your children. Do not ever impregnate Jewish females, with the intent to stick around for the child's upbringing, if you are hoping to have a pure White child as a White man. Jewish girls are for sex, not for motherhood. Furthermore, Jewish pussy is sexual reparations for the Transatlantic Slave Trade and during WW3/Civil War 2 or an alien invasion, I would rape the shit out of jewish women and start a breeding program.

A lot of jewish women lie and say they are White and they will trap you with a jewish baby and boom, your child has to be circumcised and taken to the synagogue and brought up (((their way))) and in their culture and values. The jewish people also believe you are what the mother is. The One Drop Rule came from them. Partus sequitur ventrem came from them. Read Deuteronomy 23:8. That said, if the pussy is Jewish, anything that comes out of that pussy when that bitch goes into labor is also Jewish. If you're redpilled and your bitch is Jewish, there is nothing wrong with fucking her. Fuck her, get her pregnant and dump her. Give a fake name and number. If you have an STD like herpes or something that is not HIV, larp as a jew and go cum inside some Jewish thots. Infect them. This is a war at the cellular level. The less "pure" jews born from Jewish wombs is another technically mixed-race child and one less Jew. The less attractive a Jewish woman is to a potential big bucks lawyer husband, that is less jews born. Jews are already a mutted Manson family ethnic collective attempting to interbreed into Whiteness, Blackness, Asianess,

Hispanicness, Mixedness - all to pass more easily and infiltrate, then pursue leadership roles in those groups.

Jews mixed with all groups so they can have agentur to walk among all non-jewish groups and guide and influence them in a way that will serve jewish power and not rock the boat. Personally, I will never accept someone like Drake, Maya Rudolph, Lenny Kravitz, Boris Kodjoe, Blewish Jewlatto, Hybrid Vigour, Adonis or any Afro-Semite as a Mulatto or Blasian's equal. But to be honest, Blacks should not be fucking White women anyway. They only fuck White bitches because they have self hatred. Racemixing is offensive and disgusting to me. It should be disgusting to all. But naturally, some people want Latinas and Asians, like White men on /pol/ who claim to be based 14/88. Some even like Black and Mulatto pussy. So why wouldn't these Hans Hauck wannabe motherfuckers not want a White roastie slut? I know many nonwhites on /pol/ want to assimilate into Whiteness. I will never support or do it myself but you do you.

As for me, I would like to personally get some jewish bitches pregnant and abandon them to be single mothers to mongrel israniglets that grow up without a father in Tel Aviv, while I fuck a Mulatta, Hapa or Spic bitch who I would marry to start my real family with. Afro-Semites are interlopers and they are not Mixed-race. They are Jewish. A person that is over 1/4th to 1/8th Jewish is too unstable and has split loyalties to the same people that have enslaved us before in America and wish to push the Kalergi Plan to enslave Mulattos, Blasians and others. Therefore, anyone half-Black and half-Jewish should be considered Jewish and not Mixed-race. They are not my brothers or sisters. They are the opposition. The only justifiable scenario for a Mulatto man to ejaculate inside a Jewish female's vagina is when she is incapable of conceiving children or has been sterilized. Or, when he is going to abandon the child. Any female that is 1/4th to 1/8th Jewish or less is breedable by Mulatto men as anything she may give birth to wouldn't even be quantifiable as Jewish anymore and would be absorbed by our hybrid DNA. Furthermore, considering the jewish role in the Transatlantic Slave Trade and the Kalergi Plan, jewish women should be sex slaves in any Mulatto ethnostate. Any White nationalists reading this needs to get with me on this subject.

I'm amenable to the idea of jewish female sex slaves as reparations for the One Drop Rule and slavery, provided that you Whites assist us in becoming learned in gynecological health enough to perform sterilizations that leave the uterus behind as well as hysterectomies, disseminate all that you know on female makeup artistry trade secrets and techniques, disseminate all that you know on trade secrets and practices of the tattooing and body modification industry as well as gothic subculture and gothic female dress. Five pale, hooknosed gothic jewish female sex slaves within the age range of 18 to 21 per one Mulatto male is a reasonable reparations payment, alongside repatriation to the Caribbean, Puerto Rico or Africa.

Mulatto men should be sexually predatory towards jewish women during a WROL scenario and every jewish woman in a mulatto ethnostate should be fucked by at least 40 men in one week in all three holes. Jewish women should also be fucked by boars and dogs, as well as be made to suck horse cocks when not in use by their superior Mulatto masters. They should be prohibited from cooking meals for any mulattos, especially mulatto males, and should be banned from reading, writing or religion. All jewish women belong on a dick, with an ass gaping wider than HotKinkyJo's or VixenMoon's. Personally, I would unironically marry a jewish nymphomaniac that could not have children, as well as a hapa female or castiza female for having quadroon kids with if no Mulatto female could be found. Such sterile jewish fuckmeat is Satan-made and heavensent. Also, the /pol/ curse is real. Half of /pol/ is white femboys or nerds, black wallflowers, asian /r9k/ incels, spics and mulattos and all of them love big khazar milkers like that DD jewish bitch who posts on /pol/ about how she hates Mormon white girls (Hi, Pancake! I love those Jewish dick sucking lips you have! Made for big mulatto cock! I wanna fuck your face and cum in your throat!) And if you think this outlook is wrong or sick, I don't care. All jews are Satanic and this basically the equivalent of advocating for succubi and voluptious and buxom female demons to be sex slaves. They deserve it and I'm sure they'd probably enjoy it. I hate the Antichrist. Fuck Satan.

Germans should have fucked every jewish woman in Europe and turned the synagogues into jewess brothels. Hitler was fucking retarded and so was every single faggot in the German army, yeah I fucking said it, bitch nigger. Imagine putting CLEAN, FUCKABLE PUSSY, in a concentration camp. Just fucking stupid. If I was Hitler, I would have gotten 1,000 blowjobs a day, fucked 100 asses and fucked every woman in the camp right in the pussy until they could recognize my dick by tactile sensations alone. Hitler was so fucking retarded, I swear to God. He really could have punished the asses of every single jewish woman and fucked them in the pussy and refugeed. He could have wrote Mein Kampf in some bitch's colon, in Morse Code, but that was too much for him. American slavery was based because they raped the fuck out of all the Black women and the Mixed women in front of the Black men, knocked them up and emasculated the shit out of the Black husband and father and Mixed men. There is nothing worse than not being able to protect your own women. G*rman bvlls should have buck broke the kike man by fucking his wives and daughters and mothers and making them have mischling children, hail the swastika, White dick and Europe then deported all of them to Madagascar. Imagine the seething and rage and disgust the jewish man would have towards his women as they lay on their backs, begging for another man. On their knees, begging for foreign dicks. Imagine the rage the Jewish man would have for the mischling generations. Imagine the jewish man crying and heatbroken, raising a son that is not his, on a island of mongrels like ther Merina, of which one of those mischlings will bring home to marry and introduce to his mother and cucked stepfather. Imagine the depression and angst as the jewish man gives up and surrenders, begging God to destroy him. Imagine the never ending torment if some girl born to his wife, fathered by some unknown German soldier went to marry and get blacked by some African buck in Madagascar. Imagine going from swindling and being on top of your enemies to being reduced to seeing your wife masturbate to her own impregnation in a German camp and still think of that nameless soldier or camp commandant. Imagine his stepdaughter that was a German rape baby with an equally swollen belly because of some Blasian islanders' voodoo African witch doctor dicks. That shit would be nightmare fuel for him. Black men faced this from jewish and Anglo slave owners as well as Irish overseers in the Transatlantic Slave Trade. The Holohoax did not happen like the jews claim it did but I will say this: The Shotoneed but Germans were too moral, too righteous, too virtuous and fucking stupid to milk the situation for all it was worth. Some of you beta /r9k/ faggots need pussy. If you hait motherfuckers ever get the chance to go 14/88 again, for the love of God do not fuck it up this time. Every single Jewish vagina in Europe should be looking like a waterballoon someone filled with spoiled milk or a roast beef sandwich covered in tubs of mayonaise before being yeeted into a wall after any kind of national socialist revival and I'm not ashamed to advocate for this. Jews were able to paint Germans as the worst monsters on Earth and brainwash all whites into submission and fighting their brothers. You are already a White supremacist extremist as a White man. The same thing applies to all straight nationalist men of any race. Oh, btw, do you still think these kikes are White? I wish Dirlewanger took over the Reich and raped the shit out of jewish bitches.

Jews are not and nor will they ever be White Europeans, no matter how much Ashkenazis brainwashed you. Since Jews were key to the Slave Trade, I feel all men, Black or Mixed, of African descent in the USA are entitled to sexual reparations. All jew pussy should go to us. All jew males should be turned out and put on hormones to be feminized into tranny pussy or be killed outright. State sanctioned khazar milkers to your doorstep, if you can prove you were a descendant of the Slave Trade. Niggas deserve the right to suck on some meaty labia minora and put hickeys on dummy thicc kike bitches with low hanging swing E cup milktruck titties.
All jew CEOs, foreign billionaires and glowniggers should be killed, their sons killed, their wives and daughters forced into interracial relationships and their wealth redistributed into a reparations fund to be paid to Blacks and Mixed people in America for the Slave Trade and for the One Drop Rule, in our case specifically. All remaining monies should be paid to White Americans for loxism and for the harm that multiculturalism and integration has caused from 1964 to now.
All jewish owned corporations and lobbies should be dismantled and their monies seized to be split between White, Black, Mixed and Palestinian persons.
The British Crown should be overthrown. All members from youngest to old, biological or married, should be tried for crimes against the people of the UK, jailed or summarily executed. The United Republics Of Britain, Scotland and Wales should immediately adopt a 1st and 2nd Amendment.
Northern Ireland is an illegitimate state. Ireland should be one nation and for all its suffering, it should be independent from this new United Republic and have no obligation to be a member state.
All Protestants in Ireland should be converted or killed or exiled into the UR hypothetical state.
All members of Liberal, Labor or the Conservative party should be jailed and sentenced to life imprisonment for treason.
Ellie Williams should immediately apologized to and released.
The last act of the UK should be to denounce the Balfour Declaration.
France should be overthrown for a Seventh Republic and the Kerguelen should be purchased by the USA.
All Mulattos should be deported to have their own state, since America is so hostile to us.
Five million Mulattos and sensible Blacks should be sent to the Kerguelen to build a NS or Technocratic, fascistic state.
The ratio should be one Black for every four Mulattos sent to this state.
This state should immediately acquire research for directed energy, chemical and nuclear weapons.
The remainder of the U.S. Black and 90% of the multiracial population should be killed as they are not needed and will only cause a Malthusian crisis. Most American Mulattos are cucks and for that reason alone should be tortured and dismembered with no analgesics, repeatedly raped, especially our women, being kept alive as long as possible by based mulattos or even racial aliens as some type of fuck toy, before being decapitated and having their fucking spinal column ripped out like the fucking Predator movies.
If America will not comply, it should be overthrown in a race war in a racial separatist alliance and this state should be built using states in the Southeast with a high Black and Mulatto population (Louisiana, Mississippi, Alabama, Georgia, South Carolina)
Purges should occur to eliminate rogue, noncompliant, Democratic Socialist/Marxist or thug nigga elements from this region.
Hawaii, Haiti, Cuba, Florida, the Dominican Republic, Puerto Rico and the Virgin Islands should immediately be overthrown and annexed into this technocracy.
All gays should be exterminated in the region.
All hood culture or rap music or drill culture should be banned.
All gang members should be inducted into the army or killed.
All persons not of African descent in these desired regions should be killed or deported.
Israel should be dismantled and turned over to Palestine. All Israel's nuclear weapons should be turned over to Palestine or dismantled.
All Israeli males should be killed, all jewish women should be forced to confess Jesus is Lord or denounce the Talmud and then commit to interracial sex with Black, Mulatto and Arab men only.
All jews must be bred out and Judaic teaching must be forbidden. Spreaking, writing or knowing Hebrew should be a crime. Do the jews like the Native Americans and you will have peace.
Sweden should be overthrown by an NS faction and a statue of Ebba Akerlund should be built on a mass grave of Arab refugees.
All nonwhites in Europe should be returned to Africa or legally constrained. If not possible, they should be exterminated.
All Whites in Africa should be returned to Europe.
All peoples of the Earth have a place, even mutts can be sent somewhere.
Jewishhness, however, must be destroyed.
Fuck them out of existence. Shoot them. Stab them. GAS THEM.
TOTAL KIKE DEATH. TOTAL DEMOGRAPHIC REPLACEMENT FOR THE JEW RATS. FREE PALESTINE FROM THE JEW. FREE WHITES FROM THE JEW. FREE NIGGAS FROM THE JEW.

- Registering for Discord, Telegram, Twitter, etc.
Don't even fuck with social media.

When To Use A Burner:
 - Swatting Someone. Obfuscate your voice because they record that shit. Tell them you raped your sister and she told your mother so you panicked and killed them both when confronted and are about to kill yourself. Make it clear you never meant for it to get this far. This is the most believable situation that will get a lot of SWAT to show up.
 - Hiding from people who are not federal national security based law enforcement.
 - Pumping and dumping a bitch that you are cheating on your wife or girlfriend with. Be mindful that call recorders exist. Pick someone dumb.
 - Abandoning a mistress to be a single mother.
 - Setting up one time drug buys.

Burner Notes:
- Get flip-phones or dumbphones rather than smartphones.
- Look into 4G LTE Straight Talk or Tracfone flip phones.
- Read this article (https://www.lansingstatejournal.com/story/news/2021/08/26/3-g-networks-phase-out-911-emergency-calls-what-to-do/5583777001/)
- Read this one also (https://www.bestproducts.com/tech/electronics/g2938/best-flip-phones/)
- Never turn your burner phone on in, or around your home.
- Take the battery out when not in use.
- Leave your phone at a place you're going to use it to make sure it never gets turned on at your home
- If possible, pay someone else to activate the phone.
- Fill your phone with fake contacts.
- Each burner should look like it has a different set of contacts in it.
- Never save your real contacts in the phone. Put them on paper, or on a separate device, but never on the phone. This information is potentially saved on the SIM and accessible to carriers.
- Pad operational calls with random calls. Dial numbers you don't know, leave messages, call tech support, send an SMS. Make it difficult to differentiate between your operations and random activities.
- Use a burner as little as possible before switching to the next one.
- If purchased from a retail store, wait at least 60 days to activate. This is usually how far stores keep security footage.
- Activate from a payphone as far away from home as possible, or at least in the area where you will be using it most often.
- Dispose of burner phones completely. Don't recycle them or throw them away in your apartment garbage. They should be destroyed completely, electronically wiped and have no prints on them.

How To Browse Tor On Tails, Without Any Issues:
 - On another device, go to bridges.torproject.org
 - Get obfs4 bridges and solve the captcha.
 - Copy and paste all the bridges to a text file. Do this two or three times so you have plenty of bridges.
 - Boot into Tails.
 - Set an Administrator Password and turn MAC Anonymization On.
 - Plug in your storage device with your bridges in the text file.
 - Move the text file to the Tails desktop through the file manager.
 - Open the text file with Text Editor.
 - Connect to the internet. Tor Connection will launch automatically.
 - Select the "Hide that you are using Tor option."
 - Put one of the bridges in. You should habe no issue but in rare occasions, it may fail. Configure your clock and/or pick another bridge.
 - Upon success, you will see this: "Connected to Tor successfully"
 - Always tape over your laptop webcam with opaque tape.
 - On your Desktop's black top panel, click the triangular down arrow near the battery icon.
 - Click the icon of the crossed wrench and screwdriver.
 - Go to the Sound tab.
 - Mute your audio and microphone.
 - Click Security Level Shield icon in Tor Browser On Tails.
 - Select Advanced Security Settings, select Safest.
 - Next, click the dust broom icon, click the checkbox and proceed.
 - Go to about:preferences in the search bar. You will be on the General tab when you enter Preferences.
 - Go to the Privacy & Security Tab
 - Under "Onion Services," select always to prioritize onions services over clearnet.
 - Under "History," always use private browsing mode.

 - In Autoplay, Block Audio And Video.
 - Under "Deceptive Content and Dangerous Software Protection," tick everything on.
 - Under "HTTPS-Only Mode," enable HTTPS-Only mode in all windows. Onions using http will be fine. This will protect you from http clearnet sites.
 - Next, Go to about:config in the search bar.
 - Click yes and proceed to edit the configuration settings.
 - Below are the following settings that need to be toggled. Type them in the search bar to pull them up:

After This Is Done:
- Cross-reference and check each one to make sure it is configured correctly.
- Click "New Identity" in the browser (The broom icon, next to the shield)
- Go to Panopticlick to check your browser fingerprint.(https://panopticlick.eff.org/)

Notes:
- Do all of this each time you start Tails and first launch the browser after booting up.
- Avoid any scam websites about iPhones for sale, guns for sale, murder for hire, red rooms, hackers for hire, bitcoin tumbling. All that shit is scammers or feds.
- Avoid any and all erotic or pornographic sites. Do not look for any porn on the darknet. This will endanger you and possibly expose you to illegal shit.
- Do not log into your clearnet email or accounts from Tor,
- When you are done browsing, close the browser, disconnect from internet and shut down Tails.
- This will provide you the anonymity you need for sending terroristic threats via one-time emails from DNMX, sending videos of executions to the media, as well as filing false FBI tips, DHS tips and NCMEC tips to get a person raided by the feds/the police.

Metadata Forensics Involving Secure Digital Evidence Vaults (From Tor):
Example of a database entry:
- file names list starting with first observed/oldest name
- file size
- first observed date
- rarity
- checksum of the file (give the file a unique identifying string, that should be unique among all other files, to be able to quickly assess if it was already shared, if it was a variant, etc and to access quickly its detailed information in a database)
- locality assessment
- language assessment
- list of text strings visible
- list of audio words spoken
- metadata container, including
- date of capture of the data
- "capture/video taken" dates and hours
- camera model and ID
- GPS coordinates

On Forensics Pertaining To Video Evidence Of A Crime, According To Tor (Edited By Me):
Law Enforcement won't care much about the little details but still they most likely grab the full container. Locality and language assessment will be based on metadata as well as visual and audio clues: a book cover in the video, wall illustrations, furniture, makeup and other products' brands, names on tattoos, tattoos, t-shirts promoting regional or local area businesses, signs in a room, labels on equipment, street signs, sounds of bird calls or mating calls from regional animals, sounds of construction, the foliage in the video, traffic signs, license plates, the language being spoken in the video. They can use AI models to get a language and location along with words and texts. Other models will give size and location of skin marks on a body and these will be used in investigations to confirm. If metadata are precise enough to geographically identify the person who created the content, they will transmit the information to local law enforcement contacts, and those will in turn move to build a judiciary case, depending on the "urgency". If the content was created recently, the case is urgent and might be built in a matter of weeks, or even days if the content shows a serious criminal offense. Always remove your metadata from photos and videos you take, Crop out sections of the video that may show foliage. Be mindful of anything laying around or in the frame that may give away who you are. Be mindful of any regional slang in your vocabulary. Don't have your local weatherman on TV blaring as you film someone's execution or whatever else unsavory shit you may be doing. Edit your voice out at any point you or your friends speak in the video. Script everything you are going to say in advance, like the people giving speeches or doing a YouTube video. International cooperation means pictures,,videos and texts are shared between countries for incremental analysis, putting all eyes on you. If you record yourself commiting a crime on someone edit all your parts out, where you speak, and replace it with robotic TTS speech like this (https://discordier.github.io/sam/ | https://github.com/discordier/sam) so that your voice is not in the video to be played on the news like that "down the hill" guy who killed those two ugly ass White girls in the park (https://www.sundayworld.com/crime/world-crime/killer-of-two-teenage-girls-still-unidentified-despite-video-and-audio-of-suspect-captured-by-victims-as-he-stalked-them-41198432.html).

On Livestreams And Manifestos:
When Brenton Tarrant went on livestream, we who watched it saw the building. I was watching it unfold. I didn't know shit about the place or the stream other than a based bong or strayan was blowing some sandniggers the fuck down. We saw the building, the floors, the carpet patterns, people's faces (every person has a unique face with the exception of clones or identical twins), heard what is now one of my favorite songs (The Crazy World of Arthur Brown - Fire), saw that the steering wheel of his car was on the right (something you see in UK, NZ, Australia and not America or Canada). There was so much doxable shit being done, in real time - looking back on it, that Brenton Tarrant would have been easily found and possibly killed on stream if Christchurch police had been aware of the stream and been in the area. I want you to imagine some cop went to that mosque many times before and recognizes this building. Imagine said cop saw that livestream on his phone, fucking off on 8chan at a drive through window to get donuts or in a traffic jam, in real time and was only three minutes away and was able to immediately response and call for backup on Tarrant. That didn't happen, thank God, but imagine it. Tarrant would then be shooting out with Christchurch police before the body count even got to 20. He never would have gotten 50 kills. The second the stream showed guns in his car with Sharpie writing, that was when the clock really started for Tarrant because that shit doesn't look normal on any given day and any intelligent cop would put two and two together and figure out he was about to blick some fools. Even a nigger cop would be like "why da fucc dis crackas gunz be lookin like dat." You can't edit a fucking livestream either or control who sees it, i.e. who screenshots or records your livestream. /pol/ bants about putting on a GoPro if you're ready to make a happening and livestreaming it but this is seriously counterproductive and fucking retarded unless you intend on going out blasting and holding court in the streets or doing triple life behind your point which you felt decades of nigger dick in the ass was worth it to convey. At the end of the livestream and the beginning, we heard Tarrant's unaltered voice. So now, someone who had heard his voice may times before or knew him personally and saw the stream unfold can identify him. He even showed his whole fucking face. BRUH. If you just don't give a fuck and are willing to die for the clout and that name, then do you. However, if you are wanting to make change, real noticeable change as a lone wolf or a small cell, you can NOT pull some one pump chump shit like a livestreamed shooting on soft targets. That's not to say I don't respect Breivik or Tarrant for what they did for their people. They were fucking ignorant. Ted Bundy, John Wayne Gacy were able to kill for years. Ted Kaczynski was sending bombs from 1978 to fucking 1995. YEARS. They were able to operate for years. If you are trying to change shit politically, you need to be far away from any motherfucking livestream. People even livestreamed in the Capitol on January 6th and got doxed by leftist faggots. People who weren't even livestreaming themselves, just people in some other dumb boomer's facebook live, who was getting hype for the camera on some Worldstar shit. This shit is fucking self-destructive and will do nothing for you, or even Whites (assuming you're White), or even the right. It's fucking stupid. Don't write a manifesto about some shit you're about to do in the next five minutes and don't livestream killings or executions or any crime. Record that shit off a old camera that doesn't have Wifi or bluetooth, that uses those big ass SD Cards, like a Panasonic Lumix DMC-TS20. Heavily edit the video in Shotcut or some other fucking video editor, crop the video to cut out excess background, remove all audio or edit out all the parts where you open your mouth hole and replace it with TTS, script what you will say in advance so you know precisely when to cut the audio out, avoid using national or regional slang words, avoid accents with slang if you are from America, block out all identifying features or shit in the video, be concealed head to toe with not a single inch of your skin showing, remove all metadata from your fucking video using Metadata Anonymization Toolkit (Right-click, Remove metadata), get on Tails, put that shit in a .7z file, password protect it, get on a DNMX or ASAPMail email account and send that shit to Russia Today and the South China Morning Post, with the password to the .7z as the email subject, put one sentence in the email like "kike politican who went missing got found, appears he lost his head hahahaha" or "so and so got his fucking head blown off by the supreme boss natsoc lords," delete the DNMX or ASAPMail darknet email account, upload it on file hosts both on darknet and clearnet, close Tor Browser, disconnect from internet and turn the fucking Tails flash drive off, then format the flash drive and break that shit with pliers and throw it in the fucking trash, with 10+ more flash drives, lined up, ready for Tails to be burned onto it with Balena Etcher so you can rinse and repeat. Avoid manifestos and livestreams at all fucking costs. Don't be like Tarrant and throw your life away instantly and only to cuck your country faster than some leftist slut politician could. Operate efficiently, in a decentralized manner, go after infrastructure and high value targets, take photos and video from a camera that isn't live, something that you own and control so you decide when the video is seen and can edit it so you don't get fucking vanned. If you do write anything, change your fucking stylometry.

Summary:
If you ever take a video of yourself killing some politician or fucking some drugged bitch in her ass, you need to be on Linux OS with a fully encrypted LUKS+EXT4 file system with a VeraCrypt hidden volume on it, furthermore, you need to have the latest Tails on a flash drive, with a persistent volume, ready to be thrown out on a moment's notice. Most importantly, anything that can identify you, the area or the person needs to be blurred, cropped out or cut out of the video. Unless the target is someone like Klaus Schwab, Soros, some kike or kike loving politician you're killing for the sake of the video and you're wanting to show you kidnapped and executed those hooknosed goblins, you don't even need to be showing the victim's face in a video because they are doxable as well. If you are just fucking some passed out slut, you should blur her fucking face entirely so she can't be recognized. Distort voices, crop and throw filters on videos, trim frames. Don't have a t-shirt from a local restaurant laying on the floor, or on you, or on the target. DO NOT, FOR ANY REASON, PULL WHAT ISIS HAS PULLED. ISIS IS A JEW FUNDED, CIA OP THAT REFUSES TO KILL OR CALL OUT JEWS. DON'T THINK FOR ONE SECOND, YOU CAN HAVE A FULL COLOR, UNCROPPED VIDEO, WITH YOUR UNEDITED VOICE IN IT AND THE FACE OF THE TARGET SHOWING AND IT'S NOT DOXABLE. BE FUCKING SMARTER. NO LIVESTREAMS, NO MANIFESTOS. CONTROLLED AND DELAYED RELEASE TO MEDIA VIA DARKNET EMAILS AND ANONYMOUS STORY IDEA SUBMISSIONS. UPLOAD THE VIDEO OVER THE DARKNET AND DISSEMINATE IT OVER DARKNET AND KEEP OPERATING, OVER YEARS. THIS IS MORE EFFECTIVE.

Watch this video before you ever think of writing a manifesto and apply the same OPSEC:

I'm sick of these faggot civil war threads on /pol/. These ways listed below are the only realistic ways America will finally die.

- National EMP - chaos ensues, country collapses, states begin to fight over who is to rule, civil war begins.
- National Blackout - chaos ensues, states begin to fight over who is to rule, civil war begins.
- National Trucker Strike - chaos ensues, country collapses.
- Asteroid impact on D.C. - succession crisis, chaos ensues, states begin to fight over who is to rule, civil war begins.
- Nuclear blast in D.C. - succession crisis, chaos ensues, states begin to fight over who is to rule, civil war begins.
- Free all the prisoners in the United States to cause chaos that would distract the army and police then airdrop guns and supplies. - martial law declared, civilians, convicts and military kill each other, police and army defect, civil war begins, chaos ensues.
- Russian or Chinese invasion, resistance begins, guerilla warfare begins, chaos ensues, occupying force is driven out or succeeds, if successful - occupation begins, country transmogrifies, world peace ensues.
- Military fires on civilians, civilians fire back, police and army defect, civil war begins, chaos ensues.
- States disobey federal laws, federal agents attempt to arrest state civilian, state agencies arrest federal agents, federal agents attempt to arrest agents of the state and occupy state agencies under federal occupation, other states activate state police and national guard, intervene, someone pulls a trigger, great blickening occurs, many blocks are spun, convention of states begins, secession ensues, civil war begins, chaos ensues.
- Great Depression 2.0 occurs, economy collapses, people begin assassinating the government kikes, government kikes kill civilians for payback, police and army defect, american troubles ensues which is not the same as civil war.
- Russia invades Ukraine, China invades Taiwan, WW3 begins due to NATO being targeted or NATO doing the most, America is dragged into it, WW3 ensues, America drafts people to fight for jew shithole Ukraine which is historically and ethnically Russian, people lose shit, resistance ensues, draft dodging arrests ensue, assassinations ensue, civil war ensues, America sues for peace and exits WW3 to fight civil war.
- Several politicians are assassinated, some old boomer is red flagged for bants on the comment section cheering for the killers, glowniggers knock on his door to talk, he livestreams and blows them the fuck down, reinforcements come and he is killed, more people rise up and kill feds when they are raided or go to the glownigger field office and McVeigh the place, people are killed in retaliatory attacks, sooner or later, you end up with the Years Of Lead/The Troubles.

In absolutely no other way will a civil war ensue and in that event that none of these catalysts occur, America will slowly rot into Mexico or Brazil over decades and the left will take full power and that will be it. Stop with the faggot maps and the faggot larps about killing blue helmets and having sex slaves. The only thing your cucked, "I live in mommy's basement" ass needs to be doing is stocking up on food and ammo and learning to run 20 miles with a fifty pound bag on, NOW. If you have medical conditions, you need to be going to your doctors regularly. Get whatever surgeries you need done now while they still see pureblooded people who don't accept clotshots. Stock up on OTC medicines, buy first aid kits, get atlases and make laminated maps. Fortify your homes if you intend to hug in or pick a rally point to hug out to. If you live outside of Alaska, the non coastal PNW or the South, move to Alaska, the Redoubt or the South. Get the fuck out of the Northeast, the West Coast and the liberal parts of the Midwest. Stock up on food and medicine, shut the fuck up with larps and this gay "nothing ever happens" shit.

Nothing happens until you fucking make it happen. Furthermore, Americans are too cowardly and weak to do shit, even with guns. Once the food is all gone and the currency is worthless, then you will see real shit, before that, nothing will happen. George Washington and Thomas Jefferson broke the laws of their enemies, Britain, to get America. If you are obeying the laws of your enemies, you are going to be stuck with them forever. This is why hood niggers are more respectable to me than the "right." They do not obey the laws of their enemy. Nigger resists arrest, dies of an overdose, niggers riot, rob you, loot from you, rape you, then get statues made for the nigger out of the melted down statues of your ancestors. White American girl gets raped and killed, Whites let it happen and they do nothing. Whites will either embrace the inner nigger and turn this shit around or be replaced by Jews with something that can, like Mexicans or Mulattos. More important than that, the founding fathers had money and connections. Weimar America has guns, soldiers and money. You can't go to war with that if you're broke. You need Elon Musk money. No one from /pol/ will do shit but a few based schizos. To the based schizos, don't do it, move to Alaska and make laser rifles or move to a White country. The faggots on /pol/ are not worth getting smoked over. All they will do is make memes of you and call you a paypig. Save my text file and study it.

If you're about starting real shit and participating in a civil war in your country, save this text file and educate yourself. Let the state collapse and let these Communist, Capitalist or Jewish faggots make the first move. Check out of society. Be a NEET. Live on a farm. Buy land. Keep your nose clean and meet likeminded others. Form neighborhood watch plans. Form small cells. Make propaganda and fashwave in GIMP and Inkscape to inspire others to do the same. The trick is not to join a national group. No NJP, no Patriot Front, No Oathkeepers, Propertarian Institute, Proud Boys, Jewgaloo Goys or any of these faggot groups until after a collapse if you are from America and even then, I wouldn't trust it. Meet some anons and meet people you know personally. Cap your cell at like four to five guys. Avoid all social media. Never post your faces on social media. Never have it. Vet them through many months of tests until you've known them IRL a few years, never revealing your true intentions for a cell being formed. Infighting must be handled before the cell can be formed. Make sure that you form a harmless group of like 10 and never reveal your full plans the entire time. Time and infighting will split your group. Once you're scaled down, feel out the mood of the group, if you know these dudes IRL and trust them and they appear to be with it, bring them into the fold. If there are no feds or snitches or people in their feelings who will leave the group suddenly, direct the immediate second or third leader personality in your faction to lead his half of the group to operate as a second cell. The trick is to inspire small cell creation. Anything a small cell does can be contained and if one cell falls, another can rise. The copycat effect also works here. If people hear about cells and lone wolves doing a lot of real shit, they will also copy it if you are successful and not getting caught. Cover yourself from head to toe like this, whenever you operate and never take a phone or smartwatch or anything smarter than a Baofeng radio, Garmin hiking GPS or Eclipse MP3 player from Walmart:

If I hear "muh glowniggers reee, nothing ever happens and two more weeks" one more fucking time, when the civil war happens, I will just gun down random Whites for being too cucked to exist.
And not in Minecraft, bitch. In REAL LIFE. Laseranon, snuggie anon, post physique anon from years ago and Polish soup anon are the only Whites I respect on /pol/. Also that Russian "no tail" poster who spams furries and Brittany Venti, for doing his own thing. I also respect that Eastern Euro mischling in Israel. The Bobby Fischer of our time. I rspect that Estonian that love chocolate milkers too.
The rest of the Whites on /pol/ should be convicted of spiritually being homosexual and then should be shot down like rabid dogs for being fucking faggots with no balls. Imagine being so much of a fucking pussy, you call me a fucking fed glownigger for trying to arm you with the knowledge to save your race, like what the fuck?

Many people call for and cheer for civil war but don't even understand what it will look like. Furthermore, they don't understand the cost, which is why men with children and wives are pussies and more likely to not want a war. If you can't look at a woman being raped and hear her screams without breaking down and crying or look at your best friend's head after it's been blown open without screaming hysterically, you're not gonna be able to stomach a civil war, let alone a terrorist bombing. Even a leg shot will kill you if you bleed out for a good forty minutes without help. During a civil war, refrigeration, antibiotics, surgeons, sterilization chemicals and equipment, electricity and food-supply logistics will immediately go down to Moldovan or African rural village levels of operation. There will be rape, murder, molestation, cannibalism, robberies, arson, general horror and destruction. If you take out your local substation with your dudes to stop the government from operating and it causes chaos, does some /r9k/ fag kill his parents and turn his disabled sister's bedroom into a sex dungeon? If the grid is taken out by Antifa, does your grandmother die in the hospital when her life support stops working because someone also hit the hospital with an RF suitcase? How many quadriplegic, comatose and diabetic people die? What if your mother gets knocked unconscious by artillery, goes into a coma and gets put on life support and you wait alongside her, right when some Antifa fags take the grid out? If you shit near a water source and wash your ass, then need to drink water, can you effectively purify the water enough for you to not die of dysentery? If you go out that door with your family or your buddies, are all of you coming back? If you go out that door, is all of you coming back? These are the questions you must reconcile with or block clear out of your mind before any war can happen. War is sweet to the inexperienced.

If you can make a fucking meme or some fashwave for /pol/, you can make propaganda, promoting small cell creation for the purposes of Minecraft multiplayer. With an artistic mind and common sense, you can easily make an insignia for your cell or fashwave representing your group and specifying to forms cells or even glorifying cells themselves, as in biological cells with some shit like "out of many, one" as propaganda and to be subliminal about your message. Hell, you could even make fashwave of yourself or two squirrels fucking but that would be cringe as fuck. Before you consider any of this shit, understand a decentralized network in software. Strive to be like that but with your dudes. Be like a decentralized network.

If you're making video based propaganda from your small cell unit of sabotaging a lock with toothpicks or throwing bricks, spraypainting swastikas or posing near electrical transformers or making personal murder videos or rape videos or videos through a rifle scope aimed out the window at someone, you need to be smart, i.e. not filming on an Android phone, not filming on something like an iPhone 8 that will put the video in your iCloud and get you raided, not using a camera that has bluetooth or wifi where you can connect to your router from the camera, not having built in GPS. Avidemux and Shotcut are some good Linux video editors. Also you want to be careful of the sounds and what you film in the background of your video. Are you near a geographic location in a city or are you in the middle of the woods? Does a local bird population sing in your area? Is there local construction that has been going on for some weeks or months with jackhammers going from 8AM to 2:34 PM every Monday, Thursday and Saturday? Edit the audio out. Remove it completely. A muted, heavily cropped and filtered video is better than a big dick in the ass in Club Fed where corrupt glownigger correctional officers will talk to you like you aren't shit and facilitate your rape, ensuring that your ass is torn up, with a Noah's Ark full of sperm in it.

Don't let a t-shirt your victim or your buddy or you may be wearing get you locked up. Don't let an empty bag of chips or a water bottle get you fucked up. DO NOT have anything regional or any brand or label based shit on you or on the ground or in your location, don't show any markings, tattoos, scars, don't speak unless you can scramble your voice, you may have a regional accent or set of slang words. Crop the video, superimpose, focus blur, put color filters and VHS effects on your videos in Avidemux. Make subtitles. Rip the fucking audio out the whole video and remove it. Don't let a song on the car radio, parked in the field you're filming in get you fucking caught. They don't sell Ozarka in Maine, they don't sell Golden Flake chips in California, Canada would not have Utz potato chips on sale, someone from California would most likely not be bumping local Richmond Virginia rap songs from artists like GSAMBO, FNF Chop or La Socket. Someone from Philly would not be playing C-Nile or C4 Kaboom songs. Be fucking smart and do not dox yourselves. If you are smart, you will heed my warning. If you are cocky, you will order regional snacks online from other states and areas, and throw an empty bag of Utz potato chips and a bottle of Deer Park water down while you're actually filming on the West Coast, instead of the East, maybe even shit from another country to try to throw off investigators as to the real location you filmed at. Don't be cocky. Be intelligent.

If they scan for CP, you know when you rape some bitch or kill someone, and your iCloud is on, you're going to go straight to prison because Apple will flag that and send that video to the feds who will then put it into evidence. For every feature they announce, there is 10 that they don't. Avoid all iPhones after the iPhone 6. Disable iCloud, turn off every single location service and turn location off. Never use the app store and never connect to Wifi or Bluetooth. Leave it in Airplane mode and use it as a 1080p camcorder. The iPhone 4S is the best one for this. Old, good, obsolete. Impossible to decrypt and hack into.Also, China is always spying on your phones because they made your phones. You thought they didn't backdoor it to gain intelligence on the USA? LOL.

  - Put old iPhone in Airplane Mode, disable bluetooth and don't put a SIM in the phone. It won't work anyways.
  - General > Privacy > Diagnostics & Usage > Don't Send
  - General > Privacy > Advertising > Limit Ad Tracking
  - Never create or log into iCloud or App Store. If you do, sign out of iCloud and/or App Store.
  - Drag and drop videos from your old $20 burner iPhone 4S to your Linux system and use Avidemux and Shotcut to filter, crop, edit and remove audio.

Rugged Cameras are good if you plan on a lot of insurgency and want to film a lot of civil wartime rapes, big riots, assassinations without your shit being smashed. If you're in a peaceful era and area, a rugged camera can be your enemy. Harder to destroy but not if you are determined. A bullet, screwdriver or sledgehammer can end rugged pretty fast. Best to pick a non-rugged camera if you're gonna be filming shady shit like rapes in a place where there is no potential for civil war or civil unrest and get a rugged camera if you plan to go Mad Max with whacking people then destroy the shit if it stops working or you have no more use for it.

Disclaimer:
If you create videos of criminal activities or even degenerate or unsavory activities, starring you, then you need to be super paranoid and act like you give a fuck and understand that you never need to use a device that can connect to Wifi or Bluetooth or use GPS, this means all cellphones, all new cameras made as of say, 2017 to now (2022) and all future devices coming from 2022 - 2030. And, if you edit such content, never use a phone or Windows or Mac. That is how to get vanned. Only use cameras, DSLRs and camcorders from 2000's to 2010's that do not connect to wifi or GPS, configure your settings not to geotag and even then, use MAT to clean the fucking metadata and heavily crop, mute or edit the video or photo. If you kill someone or rape someone and take a photo, the picture needs to be damn near like fucking fashwave with the amount of edits, black bars and filters thrown on it. An old iPhone 4S is a good cheap $20 1080p camcorder but at the end of the day, that's not a camera. That's a camera with a snitch attached to it screaming bloody murder. If you hate jail, stay the fuck away from cellphones and livestreams. If you're in a tight spot, get some cheap iPhone 4Ss to use as burner 1080p camcorders and a cell phone repair kit to take them the fuck apart. When you are done recording on your burner 4S that is not logged into iCloud or App Store, does not have location on or any apps on it, plug it into your Linux system, drag and drop the videos and pictures to your Linux system and use Avidemux and Shotcut to edit the fuck out of them. Use GIMP and Inkscape to edit the fuck out of any pictures. Remove any metadata, delete all shit from your iphone and take it apart, remove the battery and put it aside with the backplate. Use the cell phone tool kit to remove the circuitboards from the frame/screen. With gloves on, break that shit into pieces and put two table spoons of salt in a bottle of water with a few sips poured out and dump the broken iPhone 4S circuitboards in it so they corrode and toss that shit in the trash. Use a Linux distro that you installed on your PC or Laptop and encrypted with a 25+ character password using alphanumeric and symbol characters. Never use an Android for this kind of shit. Never use an Android period unless you're filming petty assaults and even then, use Lineage OS or a Linux phone. This is for rape, murder, etc. Only use digital cameras. And once you're done with the cameras, don't sell them, don't give them away or keep them unless you are filming your civil war exploits of the New Southern Rebellion and wound up a Neo-Confederate war hero immune from prosecution by the USA or whatever your nation. Because if you are Joe Blow fucking your blacked out niece and you keep that camera, you're going to fucking prison no matter what country you end up in. Destroy it.

Upload any original content over the darknet. Do not fucking trust a VPN provider to defend you. Not even NordVPN or PIA. If you wouldn't do it for something super illegal, you won't do it for this. Use Tor video and image hosts for this exclusively and solely. Get on DNMX and email some faggot journalists a link to the image or video of a senator's severed head in a fucking river. You can upload the raw video or image to an onion file host or you can .rar/.7-zip the file with a 25+ character password and put the shit on Anonfiles, solidfiles, bayfiles or 1fichier.
NEVER UPLOAD SHIT LIKE THIS UNLESS YOU USE TAILS AND DO IT ON A OBFS4 BRIDGE WITH YOUR SETTINGS CONFIGURED EXACTLY AS I HAVE SPECIFIED AND DID WHAT I TOLD YOU.

You have to have OCD and be a pro-active and paranoid person to do this shit. You should have Tails on a SD card or flash drive with the latest version, always. In addition, you need a pentesting Linux distro with a LUKS encrypted partition. FULL DISK ENCRYPTION WITH 25 - 36 CHARACTER DECRYPTION PASSWORD. ALSO LOCK YOUR FUCKING BIOS. ALSO GET VERACRYPT FROM THEIR SITE AND GET BLEACHBIT, MAT, NAUTILUS AND NAUTILUS-WIPE. Wipe files instead of deleting them and do it with 38 passes, the Gutmann method. Always wipe available disk space in Nautilus and tuggle everything in Bleachbit and wipe that. Wipe the free space 50 times a month. The larger your SSD/HDD/eMMC/NVME, the more times you need to do this shit.

Evasion & Transport After Killing Politicians And Journalists:
Act like you are meant to be somewhere, as if you did nothing wrong. Appear law-abiding at all times. When confronted, remain calm and have an actual truthful explanation, along with the malicious one that you do not tell them. Dress like a homeless person, and have a spare bag of clothes stashed in a bush incase you need to disguise after the event. Wear track pants you can rip off amd then have shorts + black long johns on. Learn about wooded areas and homeless camps. Get boiler suits and overalls as well. Prior to taking out the target, embed yourself in a tent camp. Be homeless, make a story and stick to it. When it's time to make your move, you'll have no issues. Having a tent to hide in after the operation in a homeless area could be a effective means of exfiltration. The Christchurch shootings were in my view both ineffective and immoral since they really didn't achieve anything other than helping the New Zealand government gain further control over the populace and harm public relations. I'm for acceleration but how the fuck does this help the right? Whenever someone pops off, nobody even follows through. That's what the fuck is wrong with the right wing. If there were fifty McVeighs a week after OKC, then we would be in Civil War 29 by now. The right is cucked and full of bitches and stupid faggot ass boomers who need to choke to death on a black dick. I hope boomers get their clavicles broken when their millenial kids and zoomer grandkids put them in a nursing home staffed by hood niggers hellbent on getting revenge on Massa Y.T. Cracker. The glowniggers know precisely how to get you rock hard for war and they make you edge for months on end, only to deny you the collapse, on some femdom shit. Incrementalism works because the left is not stupid. Never underestimate the enemy, and, never misunderstand the system. Do not carry a cellphone to any event where you will be beaming, stomping, stabbing or shooting. Use Atlases, Baofengs and hiking GPSes to get around. For interstate travel, use Greyhound because they don't ask much or hop freight trains. If you don't have GPS, a phone will do. You will need a phone in case you fall off a fucking train at 70mph.

- Common sense
- The ability to infiltrate a leftist circle without revealing yourself
- A baofeng UV-5R radio or Uniden radio

- A solar powerbank with a Tracfone and prepaid 4G LTE data. Freighthopping is the one time having a phone is acceptable.
- Get a PDF reader app for the train symbols PDFs I may include later. I recommend MuPDF.

https://youtu.be/VsipYHlahGs - Thieves Rob Cargo Train of Retail Packages and COVID Tests
https://youtu.be/WQYSU_B-mWM - Train stolen, taken on 10-mile joyride, officials say

Notes:
Each freight train has various types of cars, each car has a number and they are tracked by GPS and operations all over the USA. The only people who actually know the contents of each car are the people in the Operations center. The actual train conductor, yard bulls or engineers do not know what's in each car, they only know the number of the car and if it has hazmat, anything that is combustible or flammable. So in order for someone to know a car has guns it has to be an inside job from someone in Operations, you'd have to have access to the shipping manifest and be able to identify the exact car and bust it open or get lucky with like 1 in 5000 odds, plus normally there's someone tasked to follow the car throughout its destination, making hitting every single train car in the yard impossible. So if a freight train car is full of weapons from a manufacturer - they know about it and it's insured. Also, the train company (BNSF, Union Pacific, etc.) only gets paid if it's delivered but they have insurance for that also but a investigation must take place. There are three towns most Chicagoans go to buy guns. Hammond, Gary & East Chicago, all located in the state of Indiana. Since Chicago & part of the south suburbs sit on the Illinois/Indiana border, it makes getting guns easier. Indiana gun laws are not strict. CSX does not ship any weapons like that in a mixed freight unless they were tanks and other fighting vehicles. If it were a military item, there would be CSX police along with local police and most likely the item would be better covered on the sides for better protection, it would also have a GPS on the car. The on duty CSX officer will call the next patrol unit down the line and advise that the train is now in their sector as the train proceeds along its route. Any guns would be in a crate in a boxcar or an intermodal.

Miscellaneous Notes:
- If you even attempt to hop on a train full of military equipment, dozens of soldiers with guns will pull you off of it.
- Military trains can be derailed like any other train.
- Military explosives are primarily artillery, grenades and plastic demolition explosives. Derail these trains to get the explosives.
- The most likely theory on how guns get into the hood is that niggers are being tipped off, are stealing crates of guns from the trains and dropping the GPS tracked crates in the alleys and selling what they can.
- Intermodal and refrigerated train cars carry goods like guns, clothes, PS5s, foods, fruits (succulent and tart fruits, like peaches).
- Double stack intermodals and wide trim grainers are the best train cars for freighthopping. Niggers robbing trains make freighthopping harder. Don't rob trains.
- Leftists shunt trains for political eco-terrorism so now if you freighthop, you have to worry about armed high-strung bulls, leftists and derailment.
- Some cargo trains carry guns in intermodal cars and boxcars. You can most likely find guns in manifest trains (https://www.up.com/cs/groups/public/@uprr/@customers/documents/up_pdf_nativedocs/pdf_up_within_reach_manifest.pdf).
- Police will show up to derailments when the area has roads. You derail a train in a city, cops come. They know niggers steal.
- If you derail a train, do it on a bridge crossing over water or do it in the middle of nowhere. Police response will be limited and in the case of the car with the guns, you can knock crates of guns in the river and get that shit later by boat.
- You can steal trains to black roads and bridges.
- You can steal guns and explosives from trains if you have connections to someone in Operations or train manifest information. Black and White nationalists, Black and Hispanic street gangs need to pursue a future in Rail Operations and become less niggery and more political. See yourself as a government alternative. Operate as a standing government like the Taliban does or the cartels do.
- You can derail army trains to sabotage the mobilization of military equipment.
- You can use thermite to fuck up tracks.
- Guns are most likely to be in an intermodal car on an intermodal train. Intermodals are the 18-wheeler/cargo shipping containers.
- You can derail food trains with Tropicana cars and other refrigerated units to starve leftist cities.

When conducting minecraft assassinations in a crowded village you need a effective plan to:
1. Know where the target is/the route they will be taking.
2. Be able to find a appropriate vantagepoint to set up a ranged position.
3. Having a clear line of sight and the training to perform.
4. Having a thorough escape plan that accounts for every contingency. Ideally you would want to be able to pack up the weapon and other equipment into a briefcase and exfiltrate the area with no loss of equipment. However if you had the funds simply leave your equipment and book it as fast as you can that may potentially be better. You need to have a good idea where all the cameras are in your city, luckily today you can go anywhere with glasses, a non-descript hoodie and a mask on and go anywhere anonymously. Study infomation theory, if you know how government investigators track down criminals you can learn how to prepare the necessary counter measures to ensure you can escape to safety. Lots of cameras nowadays track you by your gait, phone or ID. Leave that shit at home and smack yourself in the leg with a hammer so you have a limp. If you have to, practice and fake a fucking limp.

Notes:

Cellphones and fitbits can be traced. They have IMEIs and device IDs. This kind of shit like Arduino IoT boards can't be traced but if your target is smart, they can detect the fuckery going on with their shit. Unless you went after a paranoid black hat hacker on Day Of The Rope, you should be okay.

There are all kinds of man sized sewers, tunnels and drains. Learn more in your own time and also try to figure out tunnel and sewer layouts so you can assassinate targets and get into a sewer or storm drains or tunnels. Be mindful, you will have to have a crowbar, gloves, knee high wading boots, as well as a gas mask and gas detector for possible hydrogen sulfide gas pockets, thick clothes and gloves be covered head to toe, with slip resistant soles for sewers and maybe even storm drains. Don't know about tunnels but don't chance it. You will have to he able to get a manhole up in less than a minute and get it back on in a minute once the last guy is in the tunnel, while hanging from the ladder. You will also have to have flashlights that are bright as fuck, at near 1000 lumens and will have to avoid shooting or igniting anything in the tunnels. You will have to have an escape route with a getaway vehicle waiting for you at the end. Not sure about Japan's service tunnels or Europe's. This mostly applies to Shitmerica. Japan's sewers are on another level. They are clean because shit goes to above ground sewers and water goes below. It is also like a work of fucking art down there and I can see where Jin-Roh: The Wolf Brigade got the inspiration (https://www.weirdasianews.com/2009/07/31/japans-sewer-system-fascinating-history/ | http://pinktentacle.com/2010/01/secrets-of-the-tokyo-underground/)

Fuck Electricity:
The vulnerable points on a transformer are ceramic bushings, the oil conservator tanks and the iron core, wrapped in miles of spaghetti-like copper wire.
Ceramic bushings are insulators. They are also pressurized. Shooting them will cause an explosion with shrapnel.
Perforation of a oil conservator tank or shooting out the fans will cause a transformer to immediately overheat.
Shoot the iron core. It's in the center of the transformer. So light it up. Break all that copper wire spooled around and throughout the core.
The best timeframe to hit the grid is the summer when the grid is at its absolute strain in at least 80°F+
The best time to hit the grid is at night between 11pm to 2am. The cops will be tired and there will be a shift change around 3 - 4am. You want tired hungry cops. Not freshly awake cops who just ate.
Mylar foil balloons cause power shortages. You can use these to your advantage.

Metcalf:
https://en.wikipedia.org/wiki/Metcalf_sniper_attack

Why Metcalf Failed:
• They did not build several spark gap transmitters to jam the radios the crew at the substation used to communicate.
• They did not kill the on-site crewmen. You want Blackout? Kill the people paid to stop one when you go to shoot the place up.
• They did not suppress their rifles to confused concerned people in the area as to the direction of the gunshots.
• They did not bring a jammer that would jam radio and cell service because the crewmen could have still called 911.
• They did not lure Police/Fire/EMS somewhere else with a hoax bomb threat on a airport or hospital.
• They fired indiscriminately from a vantage point with AK-47s.
• They did not release a bunch of mylar balloons to short circuit everything and then take shots at key parts of every transformer.
• They did not bring down a cell tower by cutting the big ass fiber optic cable connected to it with a wood handled fire axe.

Metcalf was done horribly fucking wrong. They should have cut cell towers as well as that area's underground phone lines.
They should have jammed broadband radio.
They should have aimed at the bushings/insulators, the tanks, the breathers, the center mass of the transformer.
PG&E was able to radio out so power was redirected.
People were able to call 911 so police interrupted the attack.
Crewmen were not killed so they were able to call for help.
The only good thing they did was using flashlights for subvocal communication and cutting the underground landline phone lines before the attack.

Biggest fuckup of Metcalf:
• Using AK-47s. They should have used bolt action scoped rifles.
• Not using brass catchers. They left over a hundred casings.
• Not killing personnel.
• Not jamming broadband radio or GSM/CDMA.
• Not making a hoax bomb threat on a airport to redirect 70% of the police miles away.

And now, a diagram of a transformer:
https://circuitglobe.com/what-is-a-transformer.html

And lastly, the vulnerable points on a transformer are:
• The Oil Conservator Tank
• Ceramic Bushings
• Core Winding
• Silica Gel Breathers
You shoot these with a scoped rifle at 2 story level elevation with cover from bushing shrapnel. Do not fire indiscriminately from a spider hole and leave 100+ shells on the ground.

I know retarded people will read this so let me explain to you:
• Cut the fucking cable to a cell tower, no E911
• Shoot breathers, overheating
• Shoot oil tank, overheating and not cooling
• Shoot bushings, no way to connect as the circuit is stopped.
• Shoot iron core, winding is being ripped by bullets, not connecting.
• Shoot personnel, they can't radio for help.
• Bring spark gap transmitters, they jam broadband radio.

Lattice Steel Transmission Towers, aka, Pylons:
• A pylon, or transmission tower, is like the WiFi repeater of power. It carries power from the distribution substations to your neighborhoods' power poles and from there to the stepdown transformer on said pole and then into your house. Without pylons and stepdown transformers on power poles, you would not have a grid. They sustain the overhead power lines.
• Pylons are made of steel. Steel can be cut like butter with the right shit.
• A two-handed reciprocating saw can be used to cut down a steel transmission tower.
• The best blade to cut steel is a carbide-steel, bi-metallic blade, aka "Sawzall" type blades.

• If you cut down a pylon, you will remove a pylon from a long line of pylons from the substations to the cities. There will be some consequences of this. You will not end every light in existence, nor will you bring down a whole part of your state. One thing is for certain: It will take

weeks to repair and your city will be blacked out for a while. They will have to go make a new pylon, turn off the local grid, go install the pylon with cranes and bolt it to the ground, connect it to the others with cables and turn that area's part of the grid back on. Not to mention, millions of dollars in damages.
* "Sawzall" blades are those bimetallic carbon-steel blades that you can saw through steel with.
* Diablo™ bimetallic blades are the best for cutting the type of steel found on pylons.

You can use an RF suitcase - an integrated RF subsystem - to fry life support in hospitals, critical infrastructure and water/power generation, take out servers, take out corporations, take out security cameras to banks/bunkers/military bases/police stations/etc to irreversibly destroy electronics and/or cover your tracks. You can also easily create these devices at home to take out anything that has no eletromagnetic shielding. It is basically a giant spark gap emitter.

How To Burn Right (Area Denial/WMD):
• Directed Energy is the best way to burn a forest.
• It is no secret Antifa is burning the West Coast. Don't play dumb, they know, I know, you know.
- Antifa uses butane, kerosene, gas, etc, accelerants.
- Accelerant can be detected in arson investigations and you don't want that.
- Using fireworks like Antifa did is also stupid because pieces of the fireworks remain, as EVIDENCE.
• To burn like a pro, get a magnifying glass and go to the woods on a sunny day. Magnify a ray of sunlight until you ignite brush, bark or a pile of dead leaves. Once you have your fire, get the FUCK out.
• Another way to burn like a professional is to use a seven watt, blue laser pointer. Pile up a bunch of leaves and a piece of paper and focus the beam to a small point. Burn a black piece of construction paper or a dark leaf to get it going.

How To Burn Right (Insurgency/Urban):
• Make Molotov Cocktails with 1/3 motor oil and 2/3 gasoline. Soak the rags in gas and let them dry. Some gas will evaporate but the rags will be more flammable.
- Use a brown or green thin glass beer bottle.
- Make sure you plug up the bottle right so the fuel doesn't pour out on you and cause you to do the Antifa Shuffle.
• Throw the fucking bottle forward in a right side up position.

How To Make Self-Igniting Molotovs:
- https://youtube.com/watch?v=OU-odCVdgLY

Eye Raping:
This is my favorite section and my favorite weapon, the blinding, burning, seven watt infrared laser pointer. Humans can not see infrared. So, when you are looking at a spot pointed at by infrared lasers you will see a faint violet dot and then come to realize you can no longer see the color red, forever. Directly looking at a infrared laser beam without laser safety goggles will pop your fucking retinas and fry your optic nerves before you realize what is happening to you. No world leader on Earth has laser safety goggles on, 24/7. No one anticipates being blinded by infrared lasers. It is not conventional at all so it isn't planned for. But make no mistake, infrared lasers are here and you can use them on your enemies.
Antifa adopted lasers because Hong Kong protestors used lasers. The cat is out the bag. Expect lasers to become used more often until some Jew cuckservative politician faggot tries to ban them. Antifa, for the most part, uses cheap green lasers (532nm wavelength) and medium to high quality blue lasers (445nm - 450nm wavelength)

- ALWAYS GET THE RIGHT WAVELENGTH GOGGLES FOR YOUR LASER - 190-540nm goggles for 445nm, 800-1700nm for 808, 980, 1064 and 1700nm, 10600nm for 10600nm lasers.

Lasers, Laser Safety Equipment, Criminal Intent, Unlawful Assembly & You

There are three types of people who interact with lasers at a riot, event, plot, etc.
- People in imminent danger of permanent blindness
- People using a laser to put people in imminent danger of permanent blindness
- People standing next to or around people using a laser to put people in imminent danger of permanent blindness

When you go to a riot, someone will have a laser. There is always one laser guy in the vicinity with some cheap ass eBay glasses on or maybe they are so fucking dumb they have none. Maybe you are so dumb, you have none. The first step to never going blind in a riot, due to lasers, is to stay the fuck at home. The next step to not going blind is to get laser safety goggles for the Green and Blue wavelengths. Any good pair of 190-540nm laser safety goggles with an optical density of at least 5 will be sufficient enough to protect you. Only a highly intelligent, malicious and calculating individual would bring a 808nm/980nm/etc infrared laser to a riot. They are harder to find and will take months to reach you if you order one as they will likely come from China after being custom built and shipped off. You never have to really worry about a high powered infrared laser at a riot. You will see three different types of lasers for the most part at a riot. Red, Green or Blue. Green and Blue being the most common and Blue being the most powerful. Antifa motherfuckers were never smart. A bunch of dumb, self-hating, White guilt harboring baizuo suburban trustafarian faggots overthrowing the Republic Of Starbucks isn't exactly the paragon of laser safety. You see them on groups like Richmond Rebellion, talking about light mage this and light mage that. A light mage is the designated laser person at a protest. And of course, none of these fucking idiots use laser safety protocols or eye protection. Antifa is full of cowards that crease when slapped so this is why they sling 100mW eBay lasers around to permanently blind people. You have to be mindful that at any protest, one of these faggots is likely in possession of a $9 laser from Wish or Alibaba or eBay, classed as a <1mW laser to be sold legally and some cheap ass glasses that don't protect worth a fuck and is pretty much the equivalent of playing Russian Roulette with your eyes.

The first step you need to take before you get involved with a laser is to make an account on a hobbyist laser forum and/or go to a repository of laser knowledge and get educated.

Collect any and all brass casings. No shell left behind. Always use brass catchers or revolvers. ShotSpotter is in a lot of places and will detect suppressed shots. Suppressed shots are as loud as a plane in the air. The best time to shoot is July 4th when ShotSpotter is strained by fireworks. The second best time to shoot is 11:59pm, December 31st. New Years Eve. Several people will be shooting so this is good aural cover. Use shotguns, due to lack of ballistics. Use subsonic ammunition in a suppressed gun for minimal report. Use Frangible ammunition always if you can. No slug, no ballistics. 5.7x28mm is the best caliber for this. Replace your barrels, your ejectors, extractors and firing pins. Ballistics can trace a non frangible bullet to your barrel through bullet striations and ejector/extractor markings on the casing, as well as the primer strike. Buy a bunch of bunch of barrels. Buy a diamond rasp file. Use it to file out barrels used in shootings. With the rasp, scrape the shit out of the inside of the used barrel. This will further fuck with the ballistics of the gun, making a match harder. One night, without taking any electronic devices, toss your scraped barrel into a river. If you fire a gun, go shower once you can to clean off nitrates and wash your clothes also. Get a black colored gun like a Glock. Silver and custom colors shine at night. Get a lightweight polymer gun. Sig, Glock, Kel-Tec etc. Do not bring ANY electronic devices smarter than a Casio wristwatch because smart watches, Fitbits, smartphones can all be traced. Do not bring anything with GPS, Bluetooth or Wifi. Do not drive any fucking smart cars with OnStar or SiriusXM. Get an old ass vehicle. They can and will track you and with OnStar, they can turn your car off in a high speed chase. Motorcycles, ATVs, old vehicles, bikes only. Have no witness or accomplice. Never bring someone else in on your work. Do not kill someone you know or in your area, not even a local politician you hate. Well, maybe a mayor but not local politicians. Too specific. The idea is to have no connections. So regional journalists, politicians, etc. If you really wanted to fuck with people, buy a bunch of range brass and just dump shells at the scene so it throws off the initial investigation. However, this is doing the most when it is not necessary. Just always collect your shells, you'll have no issues.

If you are caught with a dirty gun, you will pay for every crime that gun was used in, whether you did it or not. If you came into possession of a stolen gun, even if it has no bodies on it, you will go to jail for an illegally obtained firearm. A privately sold firearm would have a bill of sale or some means to prove transfer of ownership, even an Armslist correspondance. A stolen gun will have its serial on file with the police so when they catch you with it, you're getting charged. The best position for you to be in, assuming you are not a felon or someone not allowed to have a gun, is to have a clean gun. A clean gun would be a gun that is neither stolen, nor has any bodies on it. As a person allowed to own a gun, you having a clean gun is your legal right. As a felon or someone not allowed to own a firearm, your course of action is to obtain something that is not legally seen as a firearm, like crossbows, knives, bows, airguns and black-powder, nitro fire, cap-and-ball revolvers, pistols and rifles. If you want to own a gun and intend to use it for legal reasons, you will have to go through a background check, go on file with the ATF, pay taxes, give fingerprints, etc. It's not worth the hassle to be honest. A trackable smart gun, with microstamping, some type of RFID smart bullet and a serial number deep in every part of the gun would be a good way to make gun theft harder and make gun homicides easier to counteract. But, this will never happen and nor should it. The best gun for a person to have in any circumstance, is a ghost gun. You should never have a gun with a filed out serial number or bought off the streets. Get a Polymer80 receiver or in the case of an AR-15, a 80% lower. You want a ghost receiver with no serials.

Notes:
- You need a cylindrical thin diamond rasp to file out the inside of old gun barrels to fuck with the rifling and the ballistics when you are ready to dispose of the barrel. Ballistics involve shooting a round out of a gun in evidence to compare the undamaged bullet to the bullet pulled from the scene of a crime. If that bullet matches their damaged slug they pulled out of someone's face or some wall of a grocery store that was robbed, you're fucked. Don't be fucked. Destroy the evidence and dispose of it.
- You won't get a ghost 1911 Frame unless you work for Solid Concepts probably.
- Always use brass catchers and use gloves at all times you are shooting.
- Always toss your scraped old barrels in a large body of water so rust and water based erosion can also occur to the old barrel.
- Always melt your shells down, cast brass ingots and sell them to some recycling plant or on eBay.
- To my limited understanding, I think a drop-in 1911 barrel is the best. I may be wrong.
- Some 1911s are different so it's not universal. You should always look up your specific gun on YouTube for tutorials.
- If you toss a gun or gun part in the waters near you, you will have to deal with magnet fishing jews.
- A magnet fisher is worse than a nigger or Jew if you are reading this with intent for use.
- Always shower after shooting and wipe leather gloves with wet wipes. All other gloves must be washed.
- Even with suppresors, you need ear protection.
- Good luck, I wish you success. Cast brass ingots and sell them to some recycling plant or on eBay.
- I have never handled a gun before so I can't confirm this information at all but I have asked a lot of people, read a lot of /pol/ and /k/ threads, have common sense and a high IQ. All I can tell you about this section of the text file is I did my homework well, over years. It's real and exactly what you think it is. If you follow the tips listed herein, you will have the desired effect with no problems.
- Unless you work in a steel foundry, you're not melting guns down and you can do it in a foundry to my knowledge so you have to toss parts in water.
- I hope that all these kike politicians and journalists become cold cases on a fucking slab with no suspects.
- I want the Alexandria, Quantico, Langley, Fairfax, DC and Besthesda murder clearance rates to go to fucking 0%.
- Death to the glowniggers and rape for their mothers, wives and daughters.
- Death to the Jews.
- Death to America.
- Don't target civilians. Stop this faggot mass shooting shit and stop shooting the little guy. A weed man, store clerk or employer has no power. Some bitch who won't fuck you or some kid in your class is not worth a bullet. KILL ELITES AND KIKES ONLY.
- I hope you MK-ULTRA, glowing mass shooter faggots "plotting" i.e rehearsing your script on your boss or classmates read this. Stop fucking killing people with no power and go after the kikes and the feds. Why the fuck is there never a mass shooting at the Pentagon or at the City Hall? Why is it ALWAYS a fucking school, mall or concert. Not one of these false flag mass faggots will go to a synagogue. Not one shooting at the FBI field office. You can tell a real one from a false flag staged event. A real event is blown way out of proportion and they never let it go or it is memoryholed. Timothy McVeigh is my hero. A real one about some real shit. Rest in peace.
- I hope even the Crips, Bloods, Hoovers, GDs, BDs, Vice Lords, Latin Kings, Nortenos, Surenos, MS-13, Black P-Stones and all other cliques start coming together to kill their local FBI field agents and all D.C. congressmen and senators.
- Free Jackie Arklov, Free Tyler Barris, Free Mr. Bond, Free Brenton Tarrant, Free Larry Hoover, Free Ted Kaczynski.

If You Are Trying To Assassinate A Governor:
State capitals are public property, there is no dress requirement, but, dress professional like you belong there. History, curiosity, a desire to watch the legislative process, a want to speak with your legislator - All of these are valid excuses for being at a state capitol. The governor walks out, normally through a non-public doorway and/or into the garage directly. They are transported by his personal security detail. They do not wear laser safety goggles or body armor. It is very possible to get near governors at public events. Governors have daily/weekly/monthly agendas and many events are announced publicly on a Governor's Calender. State Police Executive Protection details do wear body-armor, typically level IIIA plates, on the front, sides and back. If you assassinate a governor, you stand to face life without parole. You will benefit from having a high powered laser but you can not get that into a state capitol building. Mayors can be taken out with a blinding laser at the mayor's office. Leave the cellphone at home, wear a dark hoodie and a mask. Have a change of clothes nearby in an area without cameras.

Killing Politicians:
- President, VP, and Speaker Of The House and their families have Secret Service protection 100% of the time as they are #1, #2 & #3 in line for the presidency.
- People like Supreme Court Justices, Senators, Congresspeople can have Secret Service protection if/when there is reason for them to have it, when there are credible threats to justify them having this but they do not have Secret Service protection all of the time, or even much of the time normally.
- Congresspeople and Senators, when they're within their home state for example, are often accompanied by a couple of State Police officers when they're in the state, and out and about in public at events, gatherings or town-halls.
- Ambassadors, Embassy Dignitaries and the like, are protected by the Diplomatic Security Services.
- Federal attorney general, Assistant Attorney Generals are protected by the FBI but other federal agencies can/do assist when credible threats arise.
- Governors are protected by their State police, and/or a special Capitol Police Detail. These outfits operate much like the Secret Service do, but only within the state, as their states law enforcement is responsible for their protection.
- The states legislature would be protected by the State Police in that state, or whomever the individual state holds responsible for their security.
- States Attorneys (within the state) would also fall under the State Police protection.
- States have also been known to hire out to private security outfits as escorts to protect their representatives when the need arises.
- There have been congressmen and senators out in their home state/town without obvious security personnel at their side but that's no guarantee that none were present.
- Non-White, Democratic senators and Congresspeople are less likely to have a personal security detail during re-election campaigns in their home state.
- For federal elected officials, stick with Congresspeople, Senators and below as softer targets when congress is not in session and they're in their home states.
- In the States, pretty much anyone below Governor, again, when their legislatures are not in session is when they're more relaxed for the most part.
- Dox them via voter registration. All politicians are registered to vote and do vote for themselves.

Wetwork Weaponry:
Melee is the worst to go. You never want to beat or stab anyone. It's too intimate.
I want to make it painfully clear that you need to be clean and you need to be quiet.
Crossbows and break barrel, nitropiston big-bore airguns can easily do the fuckers without much blood, DNA or ShotSpotter.

How To Assassinate Any (Western) World Leader (And Likely Kill Yourself 100% Immediately):

You Will Need:
- Big Balls
- A Death Wish
- Food And Snacks At Your Safehouses (Preferably A Public Cabin)
- Twelve pairs of the orange Eagle Pair 190-540nm OD6 Laser Safety Goggles
- Eleven People You Trust
- Six 7 Watt 445nm Sanwu Lasers
- Six AR-15s and 9 30 Round Mags Per Man
- All Frangible Ammo
- Brass Catchers For Each Gun And a Man With a Big Bag For Shell Dumps
- Level IV Helmets And Vests.
- Laser Safety Knowledge
- A Bag Of Screws
- U.S. Army Marksman Shooting Experience
- Spark Gap Transmitters or Broadband Radio Jammers (Jams police and secuirty radio communication so they can't coordinate or respond)
- Some Wifi/CDMA/GSM/LTE Jammers (Jams Live Feeds from Journalists and Civilians, prevents calling for help)
- Combat clothes, from head to toe, Balaclavas, all the way down to the Boots need to be black or uniform. You came to blow not to larp as Power Rangers. Black/Green/Navy Blue. Pay cash.
- Gas/Styrofoam Napalm

Unwritten - Turn your jammers on before you get there. Test your vehicles and fuel them. And no, don't pull up to the gas station during the event. Leave all phones/technology at home. Bring nothing smarter than a AA battery powered device.
0) Put on your laser goggles and do not remove them for any fucking reason. You will see blue specks in your vision of it is daytime. This is color polarization. You will be fine. Obviously do not stare or look at the Sun. They're laser glasses, not solar glasses. Don't be dumb.
1) Steal cars for getaway and steal cars for fleeing. You need four. All old 1980s/1990s cars. Go to the event with your dudes. Put on the equipment but be mindful you will be shot in the fucking face so it won't matter.
2) Watch the live summit or G7 or whatever the fuck and wait for the time the reporters and world leaders are on the tarmac. Pick one person and stick with it in advance.
3) The world leader is worthless and a puppet. World leaders don't have guns. So they are meaningless. You want the security detail. Focus on them. The people with the most power on Earth are the people who protect the world leader, not the world leader themselves.
4) Blind the security detail and shoot them first. You have to neutralize the people who will kill you first before the target. Switch mags and empty brass catchers in the shell bag. Leave nothing behind for forensics.
5) Be aware world leaders have bulletproof suits. You will have to headshot them and blow at least six in their shit. But they will be running so shoot them in the back to stop them. It'll be like being beat with hammers for them, they will drop.
6) Throw screws in the turbines of their planes so they can not take off. Put some dudes on it. Shoot the engines if you must. Stop the possibility of a takeoff.
7) Make sure that truck with the stairs to the world leaders plane is not there because agents will still be in the plane waiting to rush you. Have a guy move it if possible. If not, put a "light mage"/laser beam nigga on it.
8) Flee the scene and get to your rally point outside the city where your second group of cars are. Torch your cars that you fled the assassination in.
9) Go to some safehouses and remain for a week.
10) Get outside the country afterwards for separate destinations.
11) Unless you are smart, you will be caught because that will be immediately investigated.

Notes:
If the world leader jumps into the armored car, don't worry. They don't have laser safety glass for windows or opaque, solid metal doors with cameras and screens. You can easily blind them and the driver through the car windows. If you can see into the car, you can laser into the car. If you have thermite and gas/styrofoam napalm, you can burn the armored car to the point they jump out. If you can't get them out, turn their strength into a weakness. Ram their armored car or tow it into water. Drown them. Alternatively, throw some sugar in the tank so the car shunts the engine and cuts out. Put cannon fuse in the gas tank and light that motherfucker. Burn them. Only the U.S.A. has Secret Service. Other countries have security but not like that. If you can egg Macron, you can pop his ass. This is why European gun ownership is highly restricted. But, back to reality here. Pause the John Wick Part 3 movie you're seeing in your head, starring you. Heads of state are almost impossible to assassinate. For starters, you would have to act alone. Any kind of conspiracy would be discovered, because the federal government is set up to stop this kind of thing. Look at it this way: there are thousands upon thousands of people looking to commit acts of terror on US soil. And yet, it almost never happens, because the government monitors all communication, infiltrates suspicious groups, tracks sales of weapons, money transfers, etc. Killing a world leader would be a thousand times harder than blowing up a random group of people at Walmart. So how would you purchase the equipment you need? How would you develop the skills to use it? How would you pay for it all? How would you store it without anyone noticing anything. How would you practice using it? And, if you manage all that, would you be willing to lay down your life once the deed is done? Because even in the highly unlikely event that you succeed, it is 100% impossible to get away with it. Surveillance is everywhere and in this case they will hunt you down. There are tons of people who have started plans to assassinate their leaders. But they ended up in prison, or worse, before getting very far. They got caught with an illegal weapon, or they got ripped off by the criminals they were trying to buy stuff from. End of story. No one even knows what they wanted the stuff for because they were killed by some niggers and robbed or shut their mouths and took the weapons charges to avoid more time. But other, less protected politicians are attacked all the time. Assassination is seen as an extreme reaction, reserved only for the harshest reprisal and feeling wronged on a very personal level. Beyond that, perhaps people just believe that these people should be arrested and imprisoned. Most people are peaceful faggots. Appease them and they'll only rant on Facebook. Most people just wanna grill. Remember, assassination is taking the rules into your own hands and being judge, jury and executioner. Are people ready for that? Even if you assassinate them, it does not mean that their viewpoint will be assassinated. It can even make them a martyr. They need to be fought and disproven out in the open. It is an information war. Most normie boomer faggots get distracted by work and other various things to the point where anyone who even seriously considers it will be ostracized from society and, the guy who bants too hard will get a knock on his door. Along with that, politicians and world leaders are often accompanied by a whole security force in public, any of which would take a bullet for the politician/leader simply because it's their job, and unless you're psychotic, even if you have absolute hatred and rage for a given politician, you'll still probably regret taking the life of a person. Also, security is so tight around such figures that they often have drones and aircraft flying above them equipped with such powerful cameras they can see handwriting on documents someone has in their hands from that high up. It wouldn't be much of a challenge to see someone with a gun or other weapon taking aim at a politician and have the security blow their noodle pack out their heads. And going back on the point, people are often distracted by work and other things, plus people in general are complacent, rarely actually driving any sort of change. The current protests in America wouldn't have happened if people still had work to do, but all of that was cancelled due to a pandemic that made it so people didn't have to go to work or school and if they did it was transferred online. You would have to make it impossible for the blue collar man to work, be entertained and to feed his family, unless you have a national drought, national supply chain shortage and national blackout in your gun safe, it's not gonna happen. You will have to be content with low level politicians. All of whom are just pawns and are easily replaceable in the long term. If you assassinate a puppet, you have thrown your life away for nothing. Infrastructure, industry, food production and standard of living are the only rational targets in any event. Killing people makes no sense when it will do nothing for you but get you fucked in the ass in jail, unless it is some type of personal beef and dealt with in a way you will get away with. Who the leader is really has no bearing on your life when they all work for the same team.

What You Should Do If You Ever Wind Up In A Government Building During An Attempted Overthrow:
- Do not go to the event if you are over 50 years old. Stay the fuck at home, faggot boomer.
- Do not go if you are female or have/had two titties and a cunt. Stay home, you stupid three hole fleshlight.
- Do not go if you are a fucking Karen GOP lover.
- Do not go if you intend to bring signs with your handwriting on it.
- Do not go if you intend to wear unique patches or bring unique flags found no where else and doxable straight back to you.
- Do not go if you are fat, have a bad heart, bad back, leg sprains, if you are a realtor, a grandparent, etc. Take your flubbery, blubbery ass back to Burger King.
- Do not go if you have a Facebook, Instagram, Twitter, etc. Go the fuck home and stay there.
- Do not bring your cellphone or any electronics to a riot in a government building. No tech or you have to go back.
- Cover yourself from head to toe, wearing no patches or waving any flags typical of Trump, MIGA, Qfaggotnon or any of that Cuckservative boomernigger shit.
- Do not speak, use military hand signs. If someone has cameras and mics and you're showing face and talking, you are being your own prosecutor.
- The only thing you need to bring is Baofeng Radios and LCD wristwatches.
- Bring cell phone and spark gap radio jammers to stop all Federal Agent/Police communications. This may/may not affect military/national guard.
- Smear Lofentanil-DMSO on keyboards, mouses, doorknobs inside the room, on personal affects so whoever touches the shit gets an instant OD 400x the normal overdose for elephants and dies.
- Use a Linux Live USB to forensically carve (clone) their drives. If you can't do it, copy everything to a flash drive. Drop it in the mailbox of the Russian or Chinese embassy.
- Take the hard drives/SSDs from the politicians computers. DO NOT TAKE PHONES OR LAPTOPS.
- Put a virus in the computers. Preferably encryption virus that permanently locks them out or a trojan.
- Avoid all the cuckservative boomer faggots doing the MIGA/trumptarded shit. National Socialists and Fascists should be way smarter. Get in, get intel, get targets and get the fuck out.
- Actually know the layout of the fucking building you run up in before you fucking show up. Have a laminated map with you.
- Bring 7 Watt 445nm Blue Laser Pointers and 190-540nm OD6 Laser Safety Goggles
- Do not allow your group to be split by a nigger police officer deliberately touching your shoulder for you to chase them. Avoid what the dumb elderly retards are doing. Fuck the noise. Tune it out.
- Avoid shitting, cumming, pissing or spitting in the Building.
- Bring zip ties or flex cuffs. They restrain captives.
- Bring TIHK keys, handcuff keys and ceramic blades. They get you out of cuffs.
- Do not trust outsiders who are not in your circle, the circle you came with to do real nigga shit. Do not allow some QAnon faggot in your natsoc circle and conversate and do not join theirs. Don't cheer with them. Don't boo them. Ignore them.
- Take a polaroid/instant camera if you can, so you can get photos.
- Set the building on fire. Actually destroy the institution at the physical level. Fuck the other people there. If they're smart, they'll leave. If not, you get roasted retards for dinner.

- Blind your targets with lasers. If you have to, blind cuckservatives and law enforcement who are physically in the way of you and your target. "BUT THEY'RE WHITE/MY RACE-" Yeah, shut the fuck up. That person would kill you or turn you in. They are not your people. They are slaves.
- Slaves chose their side. If they are in your way, blind them. If they try to put your laser from your hand or your goggles from your face, shoot them in the face. If they rush your friends, shoot them in the back. But shoot them.
- Use revolvers and rifles with brass catchers if you are doing on-site executions or executions period. Use frangible ammo only. Leave no slug with striations for ATF ballistics. Leave dust and only dust as you are a ghost.
- Leave no shell casings unless you want to deal with NIBIN. You don't.
- Take your target away immediately. Once you grabbed who or whomever your dudes were intent on clapping, get the fuck out, don't steal or put your feet on a desk for some photo. Don't steal cards or letters like that one dumb cockeyed redneck looking like an ayy lmao.
- If someone takes a picture of you, take their phone and smash it. I don't care if you are a Nazi and they are a 200% "insert your race/ethnicity" Cuckservative. Fuck the morals. They are not Nazis like you and that is all that matters. Smash that shit. No pictures.
- I personally believe that for someone to be my kind they have to be the same race/ethnic group, AS WELL AS having the same mindset and beliefs. If you are the same as me but Republican, you are not my ally. You are my enemy, you neoliberal cuck faggot.
- If Whites care about their race, they will adopt my way of seeing it and stop waiting for grifters and cuck leaders.
- Have a killsite established in a pre-arranged location for the targets you captured. Be sure to film them with a camcorder. Have a script for the person to read. If they are blind, tell them what to say. When they finish, dome them.
- 1080p, 4K and closeups are gold in the film world. If you do it, show us the electrons in their neurons and every fold in their brains.
- Get on a Tails Linux laptop and wipe the metadata from the video. Upload the video over Tor to DataFileHost, Solidfiles, AnonFiles or some other filehost.
- Get a Secmail or other darknet to clearnet email account and send the link of the video to Daily Mail, RT and SCMP, Then Reuters, MSNBC, FOX, CNN, CBS, ABC, etc
- DO NOT WRITE A MANIFESTO. YOUR VIDEO AND YOUR ACTIONS SHOULD EXPLAIN YOUR MOTIVATIONS BY HOW YOU CARRY YOURSELF AND WHAT YOU BELIEVE IN. AND YOU NEED TO BE COVERED HEAD TO TOE. USE A FAKE NAME FOR YOUR GROUP. DO NOT NAME THE GROUP IN THE VIDEO. USE A PSUEDONYM LIKE "HITLER'S BONE LORDS" AS OPPOSED TO "THE NATIONAL SOCIALIST LORDS OF KENTUCKY"
- Once you kidnap the target(s), Make them take off all jewelry, lapel pins or anything that could be a GPS tracker. If they can't, sock them and do it for them. Wear gloves and dump it at the government building
- Crop The Video, Edit Sounds Out From Animals Or Construction. You should be in the woods or in a warehouse, away from landmarks or any doxable place.
- Strip them and burn their clothes completely before the video. (Removes any DNA from when you grabbed them)
- Leave The Corpse At The Scene, Toss Into Water (Because your skin cells and sweat from your hands are on them from when you grabbed them).
- Bonus Mode: Hang them from a overpass bridge at night, like the cartels do for a power demonstration. (Unlikely to work because DNA evidence.)

Lastly, never forget the line from MF DOOM's - Rap Snitch Knishes and remember it before you do anything in life:
"Rap snitches, telling all their business, Sit in the court and be their own star witness, Do you see the perpetrator? Yeah, I'm right here. Fuck around, get the whole label sent up for years."

How One Could Commit Stabbing/Cutting In The United Kingdom And Avoid Jail - 100% Success Rate

You Will Need:
- Eagle Pair 190-540nm OD6 Laser Safety Goggles
- A 7 watt 445nm blue laser pointer
- A black ski mask with a black hoodie, black pants and some black shoes. Most importantly, WEAR BLACK LEATHER GLOVES.
- A knife, preferably fixed blade with a sheath that can be washed in laundry. Ask yourself: Do you really want to fuck around with a pocket knife, at night, with orange goggles on your fucking face? NO.
I recommend this kind of knife for slashing: https://www.ebay.com/itm/363152231600?hash=item548d8f4cb0:g:D-IAAOSwBNtfkxV-&var=632308206449
I recommend a double edged for stabbing: https://www.ebay.com/itm/254192449813?epid=8081207476&hash=item447f3c895b:g:scMAAOSwSs9grC5X

0) Learn laser safety. After you learn, avoid aiming at water, white objects, metal, mirrors, glass, yourself, pets or loved ones. Wear your goggles at all times you handle the laser.
1) Put on your laser safety goggles and take your laser and your knife with you.
2) Burn the CCTV cameras with your laser. You can also use a laser to turn off street lights
3) Blind the person you're gonna stab put it directly in their face for like two minutes, with respect to the duty cycle, allowing it to rest after the 60 seconds of beaming.
4) Stab the shit out of that motherfucker in the stomach and chest, with your gloves on.
5) Sheath your knife (NOT WHILE RUNNING YOU DUMB FUCK) and get the fuck out of there.
6) Wash your knife, sheath and clothes.

Fuck Fireworks:
I notice Antifa uses fireworks because leftists are stupid as fuck and fireworks are all they can get. Fuck that shit.
+ Buy black powder, BB gun 12g CO2 canisters, visco fuse and drill bits.
- Drill a hole into the top of the CO2 canister after you use it or puncture it to make a bigger hole.
- Put black powder into the CO2 canister.
- Put visco fuse into the canister and seal it with glue. Use hot glue at your own risk. Foam glue or some kind of putty is best. No cyanoacrylate/superglue.
- Congrats, you now have a small IED.
- Here is a video of a CO2 canister powder charge:

+ Get bottles, liquid HCL Drain Cleaner/Toilet Bowl Cleaner, aluminum foil and a 2 liter coke bottle.
- Make quarter sized foil balls. At least 12. Put them in first. Fill up the bottle with drain cleaner just enough that the balls are almost submerged. Seal it immediately. Make sure it's sealed. Shake it, toss it.
- This is a Works Bomb. In 10 - 20 minutes, it will go off. In a confined space, it is dangerous. In a riot, it is a noise maker louder than a gun and a diversion device.
- Here is a video of a works bomb:

+ Get Styrofoam cups and Gasoline and a 5 gallon bucket.
+ Break up Styrofoam and add gasoline slowly, stirring.
- The foam will dissolve into the gasoline.
- You will eventually wind up with a dough like material that is highly sticky and very flammable. This material is like napalm and will burn for hours.
- It is not safe to handle bare handed or near a source of ignition.
- You can burn cars to the frame with a handful of this material.

+ Get chlorine pool tablets and brake fluid.
- Crush pool tablets into a fine powder.
- To start a fire, pour brake fluid on it.
- To create an explosion, put chlorine powder into a ziploc bag. Seal it all the way up to one corner. Leave one corner barely open. Fill a small coke bottle halfway with brake fluid. Roll bag into a tube and insert the bag slowly. Seal the bottle up tight. Shake it as hard as possible for five seconds and throw it immediately. It will pressurise and explode, like the works bomb.

Chaos And Accelerationism
What are you? Leftist? Right wing? Nazi? Commie? Centrist? Gay? Ask yourself these questions and conceptualize what your tribe is and the cause you fight for. For whom do you fight? Ponder on it. Unless you are in the middle of a riot. Then stop doing that shit and fucking focus. You have a group and a cause and you came to blow some shit down so what y'all on? Are you on that time or not? Ask yourself this. Be mindful that there are at least fifty motherfuckers around you with cameras so if you didn't mask up, you clearly fucked up.

Everyone is screaming and freaking the fuck out.
People are smashing windows. People are being shot by foam batons and rubber bullets.
The gas is flying. People are getting maced. Reinforcements are coming.
The ADS is being used. The cops are about to club you and your buddies.
What is your intent in this riot? Ask yourself this.
If you came to steal guns, steal guns. If you came to steal money, steal money.
If you came to fuck shit up, fuck shit up. But, it's not always that easy.
You need plans. You need to be able to defend yourself. And, you need to be able to do shit.

If you want maximum chaos on the streets:
 - You need to go after infrastructure.
 - You need to pass out weapons to the crowd.
 - You need to be bold.
 - You need to be fast.
 - You need to plan with some cats you fuck with and trust.
 - You need to be smart, i.e. No cellphones.
 - You need to be hoodied and masked up. Head to toe.
 - You need to have patience
 - You need wisdom.
 - You need to think outside the box.

What should you or at least one of your dudes take to a riot?
 - Cellphone Jammer
 - Wifi Deauther
 - USBKiller
 - Hak5 Rubber Ducky
 - Baofeng
 - Flashlights
 - Melee Weapons
 - Laser Safety Goggles and maybe a laser, though probably not if you came in a group. Just take the goggles, all of you.
 - Two different sets of all black clothes, head to toe, a second set for all of you, in the car.
 - One set normal clothes in the car for all of you.
 - A duffel bag or backpack
 - A reciprocating saw with carbide steel blades
 - Charged extra batteries
 - Bolt cutters
 - Padlocks
 - Drills
 - Flash drive with ransomware or something on it
 - Guns with brass catchers and suppressors
 - Smoke grenades.
 - A vehicle you can walk to, half a mile from the riot, away from cameras.
 - A plan with two back up plans
 - A brain
 - Some armor

Make sure you can be mobile with the loadout your small cell group chose.

There are many ways to fuck up shit in a riot. You could put ransomware on a bank computer during a riot.
You could steal some new phones, some guns, whatever. You could fry a bunch of computers.
You could capture the 4 way handshake of every router in the block and have free wifi in that area for life.
You could destroy junction boxes, saw down pylons, block bridges with stolen cars.
You could shit on food in a grocery store aisle, making them throw everything out.
You could do a lot.

Melee Tips:
• Never use cutting blade metal knives for combat. If you must, carry a ceramic cutting blade. It will have a metallic content but it will be negligible compared to a steel blade. This allows you to go many places armed.
• Obtain thick polymer knuckle dusters for assaults and hammerfist blows. These knuckles will be undetectable by a metal detector. Again, a weapon you can carry almost anywhere.
• For a stabbing weapon, obtain a polymer spike weapon. It will be undetectable by a metal detector.
• Polymer weapons are only detectable by conveyor belt X-ray scanners typically found in checkpoints with bodywide metal detectors.
• Polymer weapons are also detectable by body scanners typically found in airports.
- Many courthouses have no body scanners. They only have metal detectors, allowing polymer weapons to be brought on the person.
- All state capitol buildings have no body scanners. They only have metal detectors, allowing polymer weapons to be brought on the person for offense, defense or assassination.
- Low level government buildings can not detect polymer weapons.

• Steel toed boots can be worn in every government building and hospital. It is not illegal.
- Steel toed boots are a good self-defense tool.
- You can wear your boots and be waived through a checkpoint.

• If you must carry a metal weapon, carry triangular pointed metal knuckles. These edged concentrated points maximize damage and fracture bones with ease. Also, spring batons. It is only illegal if you are caught. Obviously you can not take these anywhere near secure places.
• Another good weapon is weighted knuckle gloves, also known as leather sap gloves. Wear a motorcycle jacket or motorcycle gear to justify wearing weighted knuckle gloves. In a totalitarian shithole like NYC, sap gloves are legal. You can beat the shit out of people with sap gloves while protecting your hands.
• A good concealed knife is a wallet folding credit card knife. They are polymer and metal. They are highly concealed, lightweight and good for stabbing and cutting.

*Note:
• You can NOT wear any of this shit (gloves and boots) in an airport without getting hard scrutiny, nor can you carry any of these weapons in a airport. Check your local laws. If your state bans metal knuckles, carry polymer.
• In Minnesota, NYC or DC, both are banned. Wear sap gloves. Or carry them anyways.
• In my home state, you can open carry metal knuckles but concealed carry is illegal. Polymer knuckles are not even discussed so it is grey legally. It is safe to assume you may conceal carry polymer knuckledusters. However, if you use them, expect "assault with a deadly weapon" charges.
• DO NOT USE MELEE WEAPONS. EVER. IF YOU CAN HELP IT. It is a legal nightmare to explain melee self-defense under a justice system biased towards weapon ownership and freedom. You're better off with a gun in many cases. Baseball bats and hammers do not a self defense case make.
• The best weapon to use in defense or offense is a gun or a laser pointer in the 7000mW and above ranges.

Bodies:
• There are only five common sense ways to truly eradicate a body, human or otherwise.
- Cremation
- Alkaline Hydrolysis
- Promession
- Nuclear Detonation
- Feeding Bodies To Sharks, Gators, Hogs, Etc. (Pig Farms)

You likely do not have nukes so vaporization is out of the question. You also do not have a sun or black hole so there goes that. If you are friendly with a mortician who cremates bodies, you may be able to slip one more in on Anne Frank night if they don't have cameras. If you have a alkaline hydrolysis machine, you can liquefy bodies into a nutrient soup. But you likely won't. A mortician will. Promession or freeze drying is another way to powderize and disintegrate a body. But you likely won't have this technology. Few places do. You can feed a body to gators or hogs if you have a Floridian friend or some pig farmer connections. If you're near sharks, go feed the faggot to the sharks or whales before they rot but remember people float because they are full of gas and the lungs act as balloons. So, you might fail here too. Dissolving a body in acid is Hollywood bullshit. Even cartels know that shit isn't true. It takes years. That is why they leave these barrels full of acid or lye after chopping some fucker up. Don't believe any of that Hollywood shit. Get into a mortician job or get friendly with one or you will not be able to dispose of a body ever. The methods I included from searching on the Hidden Answers onion are legitimate. These will totally dispose of the body. There will be nothing left, not even bones or teeth or hair. Alkaline hydrolysis is the most efficient way of disposal of bodies. Get access to a alkaline hydrolysis machine or get one. There will be nothing left but bone shadows (crumbly fragments). Cremation is less efficient but is the second most efficient way to dispose of a body. Buy a livestock incinerator and a farm Promession and alkaline hydrolysis are environmentally friendly, provide nutrients, are cheaper and better than burial so you should probably ask about it for your funeral arrangements. Much less than a 20k box. Cremation is cheap but ashes can do fuck all nothing. But anyway, back to the subject - Get a cow sized incinerator, ONLY IF YOU A FARMER. If you try this with no farm, you're getting vanned probably. Get cows, get ranch, get incinerator.

If you are even remotely connected to the person, the police will come to your door eventually. You have to destroy every cell in their body. Pigs can eliminate everything but hair and teeth. Crush all teeth, shave all hair and burn it in a livestock incinerator. If you can, put the whole body in a livestock incinerator. Once they are Jewish, put them in an urn and rent a car and take a road trip. A very, very, long, cross country road trip. Don't bother with dumpstering them, too risky, since one of those parts is going to be found if you chop them up and ashes will be suspicious. Check satellite maps for an area with little to no habitation. If you're in a country with logging try to find some logging roads near a stream, drive far up them, drive off the road a little bit and hide your vehicle. You should be sure to cover up any tracks once you leave (wear shows with patternless soles btw). Start walking up the road away from the vehicle before walking off the road towards a stream. Dump some of the ashes in the stream. Go to another stream on your cross country trip. Dump some more. Another stream? Some more. Another one? Gimme some more. Once that fucker is gone, toss that fucking vase in the ocean. If you chopped them up, feed the limbs and upper torso to the pigs. Cut the torso in half and keep the lower half for a day or two if female so you have some fuckmeat in the fridge. Feed that to the pigs on day three because eventually you can't fuck it anymore. Meat goes bad. If they won't eat it, incinerate it. Put the head in a cooler. Walk until you can't walk a step farther. Then keep walking. Once you're suitably secluded dig a narrow hole at least 10 feet down. At the bottom dig out a section, lengthwise the height of the head (perpendicular to the narrow shaft and put the head in it. Refill the hole with all the dirt you used and pack it tight all the way, try to get all of the soil on the surface spread out again or in the hole. Get some plant matter (grass or small shrubs) and plant it on top of the hole. This will make it very difficult to tell there was ever a hole there.

Leave and pray to whatever god you have. On your way home, dump whatever tools you used on the side of the road or in a dumpster or something idk (a thrift store would work well too). Of course you'll need an alibi too but that's your job. The in-vogue sterilizer in the forensics world today is ethylene oxide gas. An evil scientist probably doesn't care about OSHA and carcinogens, etc, so just cooking the room in ethylene oxide would probably be the easiest solution. It's a well-known disinfectant and will destroy all microorganisms and render DNA unusable for profiling purposes. As you can guess, it's also highly toxic and is applied in very controlled environments so as not to expose the operator to it. You obviously can't autoclave an entire room, but you can sure pump a gas into it. Here's a scholarly snippet for you: Comparison of the effects of sterilisation techniques on subsequent DNA profiling. "Four sterilisation techniques (UV, gamma and beta radiation and ethylene oxide treatment) were examined for their potential to degrade contaminating DNA to such an extent that subsequent DNA profiling was impossible. This work indicated that the most successful technique to reduce DNA contamination was ethylene oxide treatment." PCR machines are used in the medical field to test for certain types of DNA (or RNA) to detect certain things, usually viruses. I'm not going to go over how a PCR machine works (that's another whole answer there) but suffice to say that they're used for DNA detection. A 10% sodium hypochloride (Bleach) solution is the recommended method of cleaning the machine to prevent DNA contamination of the next sample from the previous sample. Don't be at the scene and don't go near the body and you won't have the problem. Shoot the guy from 300 yards away with a scoped rifle, take your shell with you and use frangible ammunition. If the police don't find the spot you shot from, the only evidence they will have will be the bullet but since frangible ammunition disintegrates, they won't have it. Melt the shell. Consider the method Mohammad and Malvo used. Look up the DC Sniper. All credits to Quora and Hidden Answers for this shit.

Raping Female Politicians, Male Politicians' Wives & Daughters, Bitches In General:
First and foremost, permablind any woman you are going to rape with a 445nm laser that is at least 7000mW (7 Watt) for like five to ten minutes. But, if you insist on not doing that, dox the politicians' daughters or the femcunt politicians themselves. CDC employees and media personalities also count here. Rohypnol was a very popular choice for date rape. It was used in clubs, bars, restaurants. It is tasteless and odorless. The girl acts and appears very drunk and cannot remember what happened afterwards. It was so popular that the new Rohypnol tablets have a blue dye core so that when put into girls drinks, clear drinks will turn blue although it is harder to see in dark drinks such as those mixed with Cola. From what people say there are still alot of the older tablets available however that are colorless/odorless/tasteless. There are others but I believe that was the most popular. It is a very powerful drug and must be carefully administered like most drugs. Usually girls should be in groups, with at least 1 girl staying to watch and make sure their drinks are not spiked. However, a politician's daughter is a rich brat cheerleader type, not a smart nerd girl or a art hoe wallflower or a goth chick. You can use scopolomine to get a girl to fuck you but that is not gonna be in the USA most likely and that is not what this is about. This isn't about getting your dick wet, it's about conveying power on a politician's body or their family. Ketamine is a good rape drug. GHB is also another good rape drug. You can either infiltrate the politician's daughter's social circle and date rape the politician's daughter, or, you can break into her dorm, her family home and rape her. Kidnapping is also possible here. GHB - Gamma Hydroxybutyrate is easy to prepare - Has no taste in orange juice apparently. If you find or prepare it, only use 1 teaspoon or less for 500ml of drink. DONT EVER USE MORE.
Order the bitch two Screwdrivers at a bar with extra juice and put half a teaspoon in each.
If you don't know what a screwdriver is: https://en.wikipedia.org/wiki/Screwdriver_(cocktail)

But, back to reality here. Get dox on the political bitches. Blind them and rape the fuck out of them.
If she picks you out of a lineup, they will test you. Blind bitches don't pick people out of lineups for rape.

You would need:
- A dick extension as they can tell what size the rapist has.
- Use a condom to prevent dna testing from precum and a mask would also be helpful
- Wear a full face halloween styled mask.
- Don't talk because if she hears your voice, you can be identified
- To shut the fuck up. Never talk about it, never confess to the priest, the cops or a friend. Never tell anyone shit.

If you want to increase your chances of not being caught:
1) Shave your fucking pubes. Shave your entire body, everything including eyebrows, lashes, arms, legs - everything. If they find one hair or dandruff/skin flake, you can be identified. Make sure not to spit, sweat, sneeze, flick a booger or ejaculate. Even pre-cum will fuck you over. USE CONDOMS.
2) Make sure not to carry ANY of her hair away from the scene. If they can find one eyelash in your car or on the sleeve of your shirt, you can be identified.
3) Wear gloves on your hands. Leather.
4) Do not take any fucking souvenir from her - panties, earring, etc.
5) Do not take a video or photo of anything. NEVER FILM HER RAPE. HER VOICE OR BODY MARKINGS OR CLOTHES WILL GIVE HER AWAY AND CONFIRM THE RAPE HAPPENED, PUTTING THEM ON YOUR TRAIL AND SHE WILL DESCRIBE YOU.
6) Do this in a area without cameras.
7) Pour water onto the ass and pelvic area so any possible thigh and hip sweat can be washed off.
8) Make the female douche with Summer's Eve.
9) Give the bitch Plan B because her Plan A to not get raped failed.

Suffice it to say, there are A LOT more ways for you to get caught than ways to get away with it. Just don't even do it. Blind the bitch and be done with it. Rape is fucking despicable. Unless Jewish. If a bitch is Jewish, her rape was justified and she deserved it. A Jew is less than a pig. Rape them and stompbortinate the semite baby. Jews facilitated the Transatlantic Slave Trade and now they are carrying out the Great Reset and Kalergi Plan. Jewish people suck baby dicks. The only good jew is dead or chained at the ankles and raped until their jewish tricks and spirit is no more. The best thing to do to a Jewish bitch is make her suck a dog dick, lick horsecocks, get fucked by boars like those Whitney Wisconsin-tier ArtOfZoo/K9Lady bitches on LuxureTV, then pimp her out to niggers, with no rubbers. Species-mixing is wrong and so is race-mixing but there is nothing wrong with an animal like a dog fucking another animal like a Jewess. The only scenario in which you could rape a bitch is if she is blind and can't fight back or do anything. With a high powered 7 Watt Sanwu Striker laser, blind the bitch over a thirty minute period. 60 seconds on, 30 seconds off, 60 seconds on, 30 seconds off. Gag her, tie her up, put the laser about less than a foot from her eyes, burn her eyes out. After thirty minutes, rape the shit out of that bitch. Be sure not to groan, moan or say anything because if she remembers your voice, you may be fucked one day.

Notes:
- If you're not a doctor or someone intelligent that can figure out doses based on weight and height, do not try to drug someone, you WILL kill them.
- Learn about weight, height, in relation to how much liquor you need to give someone. You need to have this down to a science. Become a bartender, a dentist, doctor.
- If you intend to record rapes, use a Linux distro OS. Not Mac OS X or Windows. Windows and Macs will get you put in prison the second you need a repair.
- Linux can be wiped with sudo rm -rf and you can decide what is installed/allowed to run on your system. You also have real LUKS + EXT4 encryption.
- It is best to use something like Tails, ParrotSec, Kali with encrypted partitions with long passwords and a cryptsetup LUKS nuke key.
- If you want to ass fuck a passed out bitch, you must give her an enema first and douche her after sex.
- If you want to pussy fuck a passed out or drugged bitch, you must douche her and make her shower.
- If you plan to use iPhone to record a rape, you want to make sure that iCloud is turn off. And never use an iPhone with iOS 15 or anything later.
- If you use an iPhone for recording rapes, avoid all newer iPhones that got iOS 15. Use old iPhones like the 4S, 5, 5S, 6, etc.
- The FBI exploited Syed Farook's iPhone 5 via the Lightning Port's exploits after the San Bernadino shooting but they didn't break the encryption.
- Ergo, the safest iPhones would be 3GS, 4, 4S, and the 30 pin connector iPod Touches.
- Do not use an Android to record a rape. Even if you delete the video, it will still be recoverable by forensics in RAM without root. iPhones are truly encrypted.
- If you intend to rape, use an old Panasonic or Canon point and shoot camera from 2000s - 2010s. Do not get 2020s era cameras with Wifi and Bluetooth.
- Use Old Cameras/camcorders such as ones popular ten or eleven years ago that use the large SD cards. Google some good past era cameras and research specs.
- Also, disable the location services before you record. On your iPhone, tap Settings > Privacy > Location Services > Camera > Select "Never"
- Turn all location information off.
- Lastly, go to Settings > [your name] > iCloud > select "Off"
- Marijuana is safe. It has nausea reducing properties. No one dies on weed.
- Acid is safe but unpredictable. You'd want to get a bitch on meth or put her to sleep, not be seeing five dimensional space crystals.
- ALWAYS WEAR A CONDOM IF YOU USE YOUR DICK.
- ALWAYS WASH HER HOLES IF YOU EAT HER OUT.
- ALWAYS WEAR GLOVES IF YOU FINGER HER.
- DON'T RAPE YOUR DAUGHTER, SISTER, COUSIN OR ANY FEMALE YOU ARE RELATED TO OR KNOW.
- GO AT LEAST 25 MILES FROM WHERE YOU LIVE AND WORK TO RAPE.
- DOX THE PERSON YOU RAPE DURING, IMMEDIATELY AFTER OR IMMEDIATELY BEFORE. THREATEN THE LIFE OF THEIR RELATIVES IF THEY TALK.
- DON'T LEAVE MARKS OR BRUISES OR TAKE SOUVENIRS.

Feminism is a giant shit test. It sorts out men from boys, that is the true intent. This can be proven by current observation. Women are being hysterical to be treated as equals and to have rights due to being weaker in women's sports when tranny faggots take their weaker status away from them. A majority of trannies are Female-To-Male. They want to be protected from bad genes and have male privileges in a patriachical society without putting in any work. As for bad genetics, that is autists, broke ass fuckboys, stalkers, incels or weaklings. ALL heterosexual sex is rape according to feminist tards. Chad could rape five old women and a kid and thots would still fuck them. A fat bald white guy who's blue collar smacks a woman's ass and he'll go to prison. You have to be fit, attractive and confident, as well as brazen. If you have a good plan and tactics, you will never be caught committing rapes. Some women do not report rapes ever and some wait for years. If you rape your own sister or daughter or cousin or girlfriend, they'll talk. If you rape your wife, she is less likely to talk. You will have to have been abusing her already. If you hit your girlfriend and she said nothing, you can probably rape her and she won't talk. Don't chance it though. Beauty is in the eye of the beholder. You may be an ugly monkey to one bitch and Jeremy Meeks to another. Learn how to do cold readings and study human psychology. Find some church girls or nerd girls. Being immortalized and living forever in the cunt's memories and nightmares will rewarding. Everytime even a pap smear happens or a tampon goes in, the bitch will remember the time she got her brains fucked out. Rape can be a tool of war for example. There are military commanders who have not only tolerated but encouraged their soldiers to rape in an attempt to demoralize them and force them out of the fighting mindset in to a defeated one. Stockholm Syndrome + PTSD in the enemy women is more humane than having to kill everyone along the way. It's just getting punched in the cunt with someone's dick for like 20 minutes and getting some fucking sticky juice in the cunt, mouth and ass. It's not like being cut in half with a waterjet and getting your arm cut off. Bitches are honestly fucking hysterical and blow rape out of proportion. Be sure to rape her more than once and rape her on camera. Get pictures and videos and crop scenery and faces and local small businesses t-shirts with logos out. Women ovulate after rape and the death of a child because of biological urges they have evolved to benefit the collective subspecies of the human family via reproduction. Don't rape kids, you stupid pedo faggots. That's just fucked in the head.

An ass can take more than a pussy but you need to make sure it's stretched out to make proper use of it. Spend the time to play with her holes and make sure she is comfortable with your fingers first. Clean your nails and clip them. 30 minutes of foreplay (cunnilingus + fingering with two fingers). Continue until she is dilated. Give her a warm water enema. 98.6 degrees is the normal human body temperature. 212 degrees is fucking boiling. If you are dumb enough to put 212 degree water in an ass, you don't need to live. Hot water helps to relax muscles and loosen them. Your asshole/sphincter is a system of muscles. You want 100 - 110 degree fahrenheit water. NOTHING HIGHER THAN THIS. Finger her ass in a seated upright position to get the water out if she is too inebriated to push it out herself or is blackout drunk. Pry her ass open with both your index and middle fingers like a speculum. The water will gush out of her ass. Give the bitch multiple orgasms (Read Female Orgasm: Black Book) and tell her she is responsible for cumming all over your dick. Don't rape someone you know. She'll remember what you did. Only do it if you're planning on suicide. Family members and males closest to the woman are the first suspects, never rape anyone who knows you, always go for strange women with no connection to you. Never rape a bitch from a local bar. Go two counties over. Even another state on the otherside of the country if you have to. If you rape someone who knows you, you don't know when they will report. It's a time bomb. Some bitch you don't know can only report it once and immediately.

Don't run for elections, become actors, models or rappers if you plan to start raping females. You can never have soundbites, social media or footage of you from any TV show, interview or anything. Neither can you have any selfies or family pictures of you. If you plan on political assassinations, future murders or rapes, you need to destroy all physical photos of yourself from your parents' and grandparents photo albums from at least age 10 to present and then prevent anyone from taking future photos of you. Pay your family a visit, sneak into the photo albums, look for pictures of you taken from one year ago to ten years ago and start removing shit for later destruction. Avoid all future family photos at family events, parties or gatherings. If you are 18 or near 18, avoid yearbooks and school photos where the photographers send a payment form for photos (You can opt out. Keep it from your parents!). The only school photos you can't avoid is class pictures or graduation pictures. You can slam a brick on your foot and skip that shit easy. If anyone asks why you don't want your picture taken, they don't need to know. But, if you have to make an excuse to your family, say you are in a gang or unspecific criminal activity and you don't want your rivals to obtain your picture and walk your ass down on the street. You are the supreme rape lord/murder lord. You're not trying to go to jail ten years from now when you start raping. Don't even have your photos from five years ago on someone else's Facebook or Instagram. Especially people you don't know. If someone retarded who you don't know at all, even as a friend or acquaintance, puts a camera in your face on some Worldstar shit, beat the fuck out of them, if it's an Android, toss their shit in the river. Take the charge if you have to. Lie and say they were harassing you and beating you up for years and you had enough. Plead out. If your cousin or friend livestreams his party and runs to you and other relatives for his friends on Instagram Live, remain calm, say a few words and dismiss yourself for the bathroom - immediately. Never lure girls from online or plan to meet someone IRL from online to rape. Go out in the real world and rape in the real world. Don't be a weird stalker faggot like this faggot Adonis aka Kultor21_ aka Adonis Maurice Arnold. Twitter chasing ugly gap-toothed mongrel girls. This is rape. You want prime EUROPEAN, WHITE, EAST ASIAN, HISPANIC OR HAPA PALE SKINNED CLEAN PUSSY. Imagine going to jail for raping proto-hominid animals LOL. Furthermore, any woman you are gonna rape needs to have no idea or warning it is coming. If you're a creepy stalker faggot, you're setting yourself up to be caught later. Any bitch you want to rape, keep it to yourself, plan her rape and then execute the plan. Further, never let people see your tattoos, moles, scars, etc. Bitches don't have eyes on their pussies and asses. Put a blindfold on a bitch and rape her in the butt and frontbutt. Don't fuck up or a big black guy will be planning your rape in your jail cell. Happy raping. If you're successful, that bitch might be still cumming to her own rape years later and can develop rape fetishes or masochism fetishes.

I Have BTC, How Do I Cash It Out?:
- Use Trust Wallet and KuCoin.
- Fuck Coinbase and fuck Wirex.
- Use TextNow for verification.
- Avoid Paxful, Phemex or any of those faggot ass scammer exchanges.
- Cut out the (((middleman))) and (((kenyan/nigerian))) traders. Just avoid Paxful 100%.
- Avoid Venmo and CashApp.
- Coinbase can lock your funds so be cautious and avoid it.
- Move your shit to Bitpay and convert it to USD after applying for the virtual card.
- Store your shit on the Electron or Trust Bitcoin Wallet
- Apply for the Virtual and Physical Bitpay Card
- Once approved, you can use the virtual card ASAP.
- Send the desired money from Trust Wallet to the Bitpay wallet.
- Move it from BTC to USD balance via loading your Bitpay card.
- You now can use your BTC card to buy shit like a VISA Debit Card.
- Once you get the physical card, you can make cash withdrawals.
- Congrats, you didn't have to deal with some Paxful sped scammer nigger or some faggot from LocalBitcoins.
- Go straight to findbullionprices.com and buy silver.
- Get some XMR/XLM/ADA/SOL/ALGO as well.
- Invest in Chinese and Russian Lithium, Copper, Silver Mines.
- Use KuCoin to exchange Crypto.

Stonks:
- Never use (((Robinhood))) or (((Coinbase))). Do you due diligence and find a less jewy stock site. Never move $600 or more.
- Buy stocks in companies that will exist, even when the USA falls. Think global - Coca-Cola, Pepsi-Co, McDonalds, etc.
- Invest in Russian and Chinese shit, even Iranian. Diversify your money.
- Buy stock in companies with low prices and take companies over.
- Short any and all faggot kike hedge funds.
- Buy a shell company in a tax haven country.
- Set up a clause in hiring contracts that you can not be voted out or fired.
- Flip declining companies. Become CEOs and use your money to help lobby for the right. Help other anons. Drop them a couple hundred BTC so they can do the same shit.
- Use WeBull. It is Chinese owned.

Metals:
- You're not lugging a fucking treasure chest with pounds of metal when SHTF.
- Get a bunch of copper, silver and gold. Bars and rounds. But, trust me, you'll need bars.
- You will need metals after the war and collapse, to back the new currency.
- Many people who buy metals are delusional as fuck, thinking they will buy a 16.9oz water bottle full of diesel with a 1oz, $27 silver bar. This is nigger-tier thought. Get some of those multi-bar Valacambi shits and keep like 20 ounces of silver on you in 100 gram bars at all times when you go out publicly on your daily SHTF expedition.
- The only currency during a war or collapse is labor, food/clothing, shelter, gas, ammo, knowledge. Considering knowledge is power, you should thank me for paying you.
- Get airtight sealed containers and then fucking cache your precious metals in a Pelican case that is waterproof, deep underground.
- Geotag that shit and be sure to bury deep and put a dead dog or something on top of it on your property or in a crawlspace. No one is stealing Fido so your metals will be safe.
- After the war, go get your 100oz and 10oz shit back and introduce it to the market for the new money.

Obtaining Monero:
If you're going to transact in XMR you might as well purchase XMR directly. Buy from an exchange, withdraw to a wallet, send to a new wallet. You'll be on the record as having purchased XMR but your funds will now be anonymized. There's no point in using Tor until you're sending XMR from your Tails wallet. Reason being that the exchange will know that you're the recipient of the withdrawl so that wallet is not anonymous. Once you send to the Tails XMR wallet (or any XMR wallet) the exchange can no longer directly tie you to the funds unless the XMR blockchain is compromised which is highly unlikely for the foreseeable future.

How You Need To Handle Monero:
Exchange --> XMR wallet on Windows --> XMR wallet on Tails -- Anonymous transactions

Making Fast Money:
- Rob NGO/Elite fundraisers.
- Rob state fairs. Get $50K+
- Rob money trucks. Get $50K+
- Rob vending machines and car washes. Get thousands.
- Do not rob banks, convenience stores or any place with lexan windows like check cashing places or gas stations.

Never for any fucking reason and I mean any, donate organs in the United States of America. Fuck liberals, Marxists and blue city niggers. If they want to play dirty like this, you play dirty too. Say NO to being an organ donor. Let your healthy organs go to the grave with you while all these blue dyed pixie shorthaired tranny faggot freaks with myocarditis die on the bed crying because there is an organ shortage. Let these faggots rot in hell. If you need an organ, these vaxxed faggots in their compliance cult will ensure your new heart has myocarditis as well, not to mention ADE as well. Don't get an organ transplant in America, Europe or anywhere the Pfizer/Moderna/J&J shit was sent to. Get transplants from people in Russia or China. Meet your donor's family or meet your donor if they are alive and ask them what they got. Make sure you are not getting the mRNA bullshit that these World Economic Forum jewish faggots like Bourla are involved in. The shit they got in China and Russia was much different from the mRNA death juice. Sputnik and Sinopharm are much different than the shit Amerikards are being pumped with. It is painfully clear the American shit that is even being exported to Europe will negatively affect all who take it. Demand a non mRNA treatment or non-mRNA vaccine or leave the country. Demand monoclonal antibody treatment. Lastly, fuck Donald "Jewish Cum Slurper" Trump. He betrayed all you faggots who worshipped him and the shit he got for his vaccine is not what they will allow the inferior plebs to have ever. Knowing this bullshit vaccine is dangerous and knowing they are still trying to force it on you anyway and basically kill you with it, that would be the time to start doxing people, going places without your cellphone or smart tech to get used to travelling without being traced (or having access to E911) and buying replacement gun barrels, ejectors, firing pins, extractors and getting hiking GPSes and laminated maps to get the drop on these motherfuckers first. These people have names, faces, addresses, money, jewels, cars, clothes, wives with vaginas, sisters with vaginas, mothers with vaginas and in some cases daughters with vaginas, ripe for the fucking.

How To Get Endless Free Vulns From Shodan.io
(USE A VPN, NIGGER!)

0) Disable IPv6 in your device.
If you use Linux, open a terminal and do the process listed in the following links:
  https://itsfoss.com/disable-ipv6-ubuntu-linux/
  https://www.techrepublic.com/article/how-to-disable-ipv6-on-linux/
  https://www.linuxbabe.com/ubuntu/disable-ipv6-on-ubuntu

1) Have a VPN on. I recommend NordVPN. Be connected to it.
MAKE SURE YOUR IPv6 is disabled.
You can get free cracked NordVPN by looking up "NordVPN cracked accounts telegram"
Alternatively, you can go to crackingtutorial.blogspot.com

1) Enable the Firewall, the Killswitch, etc.

2) Make a protonmail.com account.

3) Make a Shodan.io account. You will get a free API and at least 20 searches a day. Search for shit like this:
 authentication disabled
 pipeline
 oil
 water
 pump
 pipe
 vnc
 municipal
 power
 level
 temperature

Alternatively, you can use the search queries herein.
You can search any country, OS, port that you want to search.
DO NOT CLICK THE IPs, DON'T TRY TO FUCK WITH ANYTHING. ACCESSING THE VNC SERVER WILL GET YOU FUCKED UP, UNLESS YOU ARE SMART.
Print the page you're on, Save to PDFs. This way, you get the vulns without being hit up because you have to pay to export the data.
Do you honestly want to pay 299 dollars to make a fucking list in your account?
Stay on the page and you can just print to PDF, keeping the IP, server info. This is good for VNC servers with authentication disabled.

5) Once you hit the daily API limit, log out of Shodan.io, switch VPN servers to a new VPN server.

6) Delete your protonmail.com account.

7) Delete your account.

8) Repeat Steps 3 - 7 as many times as you want.

Notes:
 - I don't think Shodan bans or IP blocks but don't try to find out. Switch servers.
 - Shodan and Protonmail do not limit the amount of accounts you can create.
 - You could theoretically do it all day from the same server.
 - When you adjust the search filter on Shodan, it counts as a new search so that will shorten your daily alloted searches each time you change the filter.
 - Do not start fucking with their shit.
 - MAKE SURE YOUR IPV6 IS NOT LEAKING
 - Try temp-mail.org for this also.

Superweapon Concept:
Oculus Of Malcontent/Orb Of Misery/Sphere Of Contempt: Multi-Layered Effervescence Radiological Dispersion Device (MLERDs)

Potential Uses:
 - MLERD cluster "bombs" that will release multiple sphere to fall into rivers, freshwater lakes, water treatment plants.
 - MLERD conical warheads.
 - MLERD radioactive graphene filled anti-material bullets
 - MLERD grenades

Description:
Radioactive Graphite Nanoparticles Within Microparticle Lead Spheroids with Elemental Sodium/Aluminium/Iron Oxide Shell, Hygric Trigger

Methodology:
The most logical method of executing a radiological attack for a hypothetical enemy would be, considering America's newfound ability to detect shielded ultra-heavy elements would be to use radioactive graphite encapsulated within a multi-layered spheroid. The outermost layer would be a water-reactive layer of elemental sodium that serves as a trigger for the next layer, which would be a mix of thermitic materials aluminium and iron oxide of the finest granularity possible. This exothermic reaction, triggered only once exposed to water i.e. dermal contact, inhalation, ingestion would be sufficiently intense to release encapsulated radioactive graphite without alerting victims to the presence of the substance on their skin except in the case of intense exposure, which would lead to severe burns. There would be little difference between the production methods for this hypothetical weapon and the known methods for producing nanothermitic explosives, save for the encapsulation of radioactive graphite within a leaden capsule beneath the thermally reactive elements.

Rather than trying to atomize densely packed and easy-to-detect radioactive elements using high explosives, a technique likely to lead to an adversary's failure to achieve its objectives and one which draws attention to the possibility of a "dirty bomb," leading to shelter-in-place orders and general public awareness, a superior strategy that may become favored by adversaries would be to use pre-granularized spheroids of the sort described here. A radiological attack of this sort would manifest itself as acute radiation sickness pockets associated with detectable radioactivity in the bodies of patients in hospitals, but no detectable levels of radiation in the public venues where exposure occurs for days, weeks, or months, depending upon the time of the next rainfall in the area affected. Shipment disguised as talcum powder/cornstarch coupled with releasing the powder from a crop-duster or if aircraft not available, then using fans upwind from target cities would be most likely.

This is perhaps the most frightful of scenarios as it would likely lead to a very high fatality rate when cancers are taken into account over a period of years, with men exposed while walking down the street fatally exposing family members with a simple hug upon arriving a home at the end of the work day, and showering in water after an exposure, rather than eliminating the contaminant, would serve only to release it. This type of attack would be most likely, impossible to anticipate and would take weeks to recognize, well beyond the point where it could be contained. As for how difficult it is, it's probably quite difficult without some rather expensive equipment, but that equipment is now in reach for entities such as Iran. Being able to basically co-locate a bunch of little 'dots' of multiple different types of metal is at the heart of semiconductor manufacturing. Any equipment that can make semiconductors can be used to do this. In large quantities, it could be used to render whole regions uninhabitable. It could be smuggled in past international boundaries without being detected by any method in use right now and crop dusters could be used to spread it. Not to mention, you'd have to have access to radioactive graphite. For this, you'd have to have a nuclear reactor, unless you had a means of rendering ordinary graphite radioactive. A person could hypothetically use an old x-ray machine from a dentist's office and just run it 24/7 to ionize regular graphite, not sure what the power requirements and time requirements would be, though. Plus you'd give yourself radiation poisoning running an X-ray machine all day unless you had proper shielding. Chemical encapsulation has just as much potential to be deadly, but it isn't as persistent as radiological contamination. Nanofabrication technology being sold by China to other countries would be the likely means of achieving encapsulation on any kind of scale.

Structure:
Water Reactive Sodium -> Thermite -> Lead -> Radiative Graphite Core

Notes:
 - Zeppelins/Blimps/Airships can release drones capable of releasing radioactive graphene dust or these spheres.
 - If you can make semiconductors, you can make this.
 - Must have a means to irradiate graphite.
 - You can drop depleted thorium dust on people from drones also

How Iran Can Survive A War With The United States Of America Without Regime Change:

Before Any Of This:
- Iran must translate this or get an Iranian who speaks English to translate this.
- Go undercover and secretive with the Iranian nuclear program and keep working on the bomb.
- Be aware. The USA will plunge Iran into a civil war to avoid a US-Iran war, if they can. Iran is highly nationalist but also ethnically diverse. A civil war in Iran will lead to balkanization of Iran. You must avoid this at all costs.
- Form a plan to fall back into uninhabited flatlands of Iran, should Tehran fall to incursion. Order the Islamic Revolutionary Guard Corp to take power of the country in the event the Ayatollah and the regime are forced out.
- The Iranian government must unify the Kurds, Azeris, Lurz, Arabs, and Baluchs with the Persians, if possible.
- Fortify infrastructure against cyber attacks by using Linux and OpenBSD instead of Windows.
- Get all nuclear facilities off of Windows, immediately. At the very least, order workers to use Linux or OpenBSD based laptops.
- Have all government computers running Linux or OpenBSD.
- Eradicate or make peace with the Sunni Muslims, preventing Saudi Arabian influence from entering the country during a period of unrest.
- Form a peace deal with Syria, Oman, Iraq, Pakistan and Afghanistan, if at all possible
- Place anti-air defenses near ports and ships on the Iranian coast and near training sites.
- Place anti-air defenses capable of taking out B-2 Bombers near Natanz, Esfahan and other nuclear infrastructure sites.

Next, the Iranian military must do the following, in the event of a direct confrontation with the USA:
  0) Mine the waters in the Strait Of Hormuz. Mine the main highways in the South of Iran. Establish checkpoints into roads leading North.
  1) Use motorcycle carriers to relay messages and orders instead of radio communications ONLY. Use coded messages. Use light signals to launch planes. DO NOT USE RADIO, FOR ANYTHING.
  2) Relay all US ship coordinates to short range missiles and launch them, taking out the ships in the Strait Of Hormuz.
  3) Use suicide speedboats loaded with explosives to ram US cruisers and aircraft carriers to explode them. Use camouflaged civilian boats as well. Target Dubai Airport and Abu Dhabi in the UAE with short range missiles.
  4) Shoot down planes using Radar.
  5) Use anti-drone weaponry for drones.
  6) Use cyberattacks on American and Saudi infrastructure, specifically oil and gas, using the Quds force.
     Suggestion: Ransomware with no ransom and no means of decryption.
     Target Saudi Arabian oil fields. Avoid ANY and ALL attacks in Europe, on European targets or soil.
     Avoid ANY and ALL sleeper cell activation in Europe. Use defensive attacks for European forces only if they come to Iran.
     DO NOT, UNDER ANY CIRCUMSTANCE provoke or involve NATO or the UN.
  7) Launch anti-ship missiles off the coast of Yemen via Houthi rebels. Target oil tankers as well as American military.
  8) Use mini-submarines to torpedo US surface vessels doing reconnaissance and surveillance. Use drones and a small strike force of planes to target from the air.
  9) Order proxy militias in Iraq, Syria and Lebanon to target US military bases and troops.
  10) Order militias in Yemen to mine the Suez canal with naval mines and to launch missiles at Saudi Arabia.
  11) Target Saudi Arabia with Shahab-1 and Qiam missiles and artillery, going after ALL Water Treatment and Power Infrastructure.
  12) Target Israel with artillery and rockets to overwhelm and exhaust the Iron Dome via Hezbollah. Order Syrian forces to capture Golan Heights. Support Palestinian forces. Have Palestians overthrow the Jordanian government. Have proxy militias fortify defenses in Lebanon and Syria to repel an Israeli invasion. Once the Iron Dome is empty, target Israel with some of Iran's supply of Shahab-3 ballistic missiles on key cities, hitting Dimona and Tel Aviv-Yafo first. Israel has nuclear weapons. Use must use an EMP on Israel or use anti-nuclear defences. Dimona and other nuclear sites must be the very first target. They have been included herein.
  13) AVOID OVERT AND DIRECT RUSSIAN AND CHINESE MILITARY ASSISTANCE. EVERYONE WANTS TO BE VICTORIOUS. NO ONE WANTS TO BE NUKED.
  14) Leave to the flatlands of Iran that are uninhabited. Have all the Ayatollah/Theocratic faction retreat to there and have the IRCG take power as a successor faction to establish order.
  15) Return the Ayatollah to power via the military once the U.S. forces leave.

Hitler was a dumbass, but you don't have to be. Also, fuck you goatfucking niggers for stealing my book, you fucking camel fuckers. I will leave this here because fuck America and Death To Israel but you are an enemy of my people. You change the book, you steal the book, you try to sell it when it is fucking FREE - you harm the message.

How To Send Information To Russia, China, Iran and North Korea:
 1. Don't be like that sexy ass Riley June Williams bitch. You will get arrested real quick.
 2. Get some juicy details.
 3. Get on Tor from Tails and use a obfs4 bridge and spoof your MAC.
 4. Go to en.kremlin.ru
 5. Write the Office Of The President, using the webform.
 6. Select "President of The Russian Federation"
 7. Send the letter. Save the .docx or close the tab.
 8. Get on a darknet email like DNMX.
 9. Send it to the Chinese Government at english@mail.gov.cn
 10. Send it to Ministry Of Foreign Affairs Of Iran at info@mfa.gov.ir and put a line in Persian that they need Englsih speakers to read it.
 11. Sit back and relax.
 12. If you steal a hard drive like that cute ass racoon faced femcel bitch, don't tell anyone shit, just take that shit right to the Chinese or Russian Embassy, crack open the door and toss the hard drives on the floor and run the fuck away. If the Russniggers and Chiniggers are smart,
they will analyze the hard drives.
