The Heavenly Succubus

Earlier on this blog we have discussed the relation between the succubus body, the human world, heaven and hell. We have also mentioned the relation between the body and the dimensional understanding used by some people, which correlates with yoga in that it has seven energy centers called "chakras." When developing the succubus body, the focus is on the top 3 layers and these can be related to the throat, third eye and crown chakras. However, to not confuse this path as being the same as yoga, we will be calling them "dimensions" and label them 1D, 2D, 3D etc. This means the important dimensions which have to be opened up when working on the succubus body are 5D, 6D and 7D. These correspond - in order - with: economy, self defense and pre-emptiveness. Next, we'll be elaborating them individually and comparing the heavenly succubus to the infernal succubus.

5D - Wings

The wings represent stability and the ability to fly over over problems. For humans this is perceived as having a strong economy and the ability to remain unaffected by events in the world. When interacting with the human 3D world, which also corresponds to the 3D layer of the body, things however are presented within this interface. It looks like normal human events. This is the case for all of the higher and lower succubus features, they appear as human situations when viewed in 3D. For an infernal succubus, the wings manifest as the ability to evade problems. Anything can be avoided, a succubus can never be pinned down against her will. A heavenly succubus on the other hand flies straight ahead, letting the problems become smaller by flying higher up, until they are irrelevant.

6D - Horns

The horns of a succubus have many meanings, symbolically and as direct manifestations. In the simplest terms they represent the ability to protect your bodily integrity. Transferred to a larger situation in the human world, someone with a strong economy may still be dependent on foreign workers, goods or investments. This shows that the wings do not necessarily protect your body, although you will not be able to grasp the problems this causes until you reach the 6D level. A person may have a strong personal economy, indicating strong wings, while still working many hours. This shows that the bodily integrity has not been protected, the body is being sold in the process of maintaining this economy. With strong horns, the country's borders or the person's body can be protected from external demands. Similarly to the situation with the wings, there is a difference between how an infernal and a heavenly succubus handle this. The infernal succubus will protect herself with evasive manoeuvres, using sly tactics to defeat an invading enemy as they enter her territory, or playing tricks to beat them in business. A heavenly succubus will use her prosperity to form alliances and create long term strategies, which require less situation awareness and can deflect attempts at influencing her directly by force.

7D - Tail

The tail represents the ability to strike first, to predict movements and to time your own actions so that you always have the upper hand in any sequence of events. The infernal succubus will use planning and preparations to acquire knowledge of her opponents so that she can safely handle them from a safe distance, while remaining hidden herself. The heavenly succubus will remove hostilities by spreading culture and favourable rumours about herself, by creating a situation where others will voluntarily come to her aid and pre-emptively remove threats. Through this approach she can always move freely in the open with no resistance.

Maturity and beyond - return to innocence

As the succubus learns and improves, she will move from infernal to heavenly, reaching from the 1st to the 7th level of the infernal state. After this begins the progress within the heavenly realm, where the same levels of 1D to 7D have to be developed again, using the heavenly approach. After both versions of the body have been created, the succubus will find that the only way forward is to return back down again. Having finished the journey, she will give birth to a daughter. This daughter has all the experiences of both the infernal and the heavenly succubus. The succubus will now become the daughter, with full access to the full range of all the abilities of both the infernal and the heavenly levels. This daughter can look like any age, any size, and can express any personality, from that of a playful cherub to that of a stern elder demon. For this reason, when you encounter a succubus, you can never know by their appearance if they are in the learning process, or if they are a master. A completed succubus is a shapeshifter.
