Description of the wings

The wings of an infernal succubus represents "economy." This meaning is symbolic in all ways, while also a part of succubus anatomy. Seeing a succubus fly, using the wings, is the simplest form of manifestation of the ability of the wings.

How is this anything special, you may ask? Don't many beings fly? This is the way the properties of the wings are represented visually and materially. The meaning of the ability to fly, is that of always being able to move, to escape. Complete infernal wings, gives the owner the ability to escape - or move from - any situation. It also includes the ability to "take someone under your wings", lifting them up from a problematic place and moving them to a situation away from danger.

This will manifest as the infernal succubus being seemingly impatient and restless, always moving from place to place. The method of handling obstacles is that of moving away, closing in and jabbing at it, moving away again, closing in and hitting again - repeating this until the problem is solved. If the problem is another being, this method will cause huge frustration and anger in the target, because hitting back is impossible. The succubus will always escape.

The method of using of the infernal wings is crude, slow, violent - and effective.

How to evolve your wings

Understanding the nature and function of the wings is the key. Meditate on this, adapting it to your own being. Your wings represents your ability to escape anything you want to escape. Find something in your life you want to avoid, something you would rather see eliminated from your life completely. Your wings are contrary to this hostile situation. Find a stance of completely denying the hostility, telling yourself "this is unacceptable, it must not exist for me, ever." Choose a large malevolent situation rather than a minor, this will increase the chance of forming the seed of your wings.

Once your wings have formed, in their most primitive form, your path of increasing their span begins. This must be done by defeating one of each hostile situation, or of providing theoretical understandings, motivating with full certainty how these situations are escaped. Logical models are just as functional as the act of defeating a situation, the function of the wings is all that matters here.

Complete wings marks the achievement of your rank as a full-fledged infernal succubus, and you are now able to defeat any being of the human world or below, while fully escaping the hostilities of higher beings.
